

## INFOSYS SFDC2D365CRM SOLUTION

### An end to end , made for purpose tool for migration from SFDC to D365 CRM

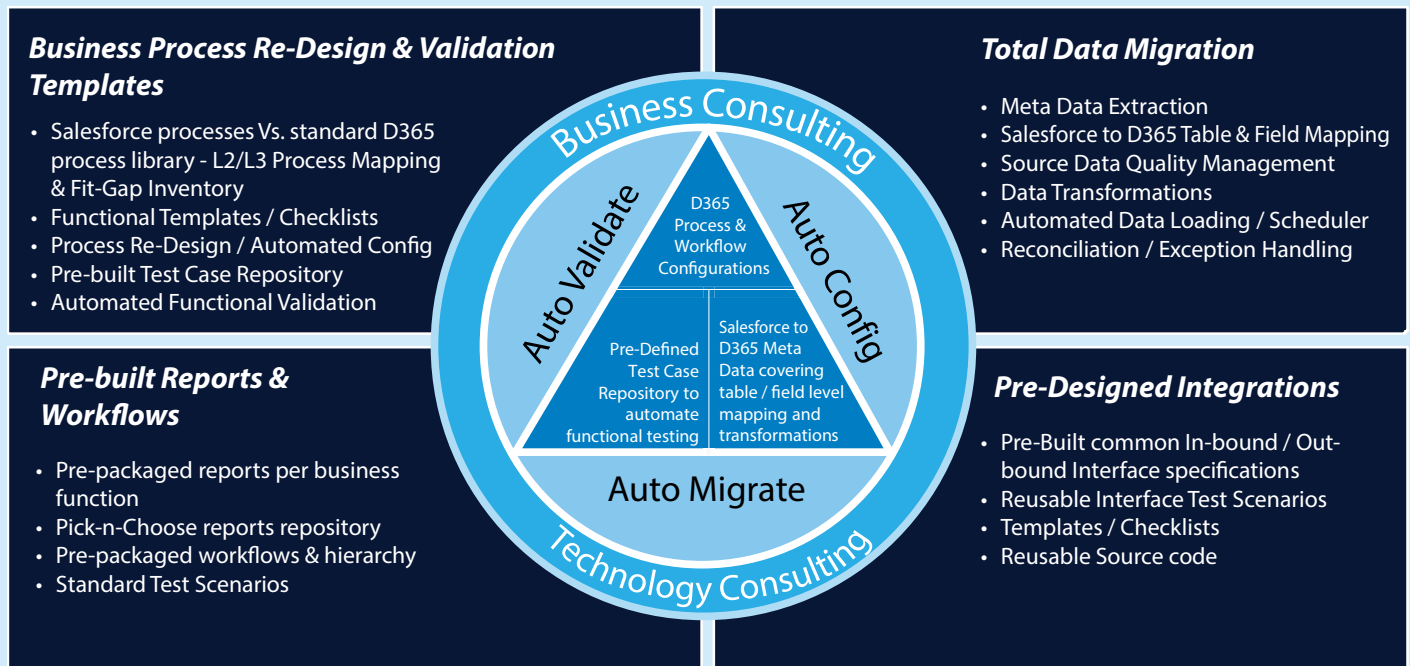

SFDC has been able to leverage cloud technology and build a variety of applications for businesses to better connect

to their customers and help give them key insights into their services through analytics and apps. However, the depth and extent of capabilities which D365 offers are much more than the functions provided by SFDC.

There are several challenges with SFDC, stemming from its extremely high total cost of ownership including the cost of licenses, implementation, deployments challenges, data management and unavailability of on-premise deployment model.

### Infosys Solution to meet the challenge

**SFDC2D365 Migration Workbench** is a comprehensive solution for SFDC to D365 CE migrations, tailored to an industry or line of business. It comprises of end to end business Process Redesign, total Data Migration, Interface & Reports realignment and Functional Validation components to provide a complete and seamless platform migration to customers, with underlying Business and Technology consulting services.

# MIGRATION

The **meta data features** extracts system metadata definition as table and column definitions, data types, constraints, indexes & dependencies automatically.

The **transactions data** related automation extracts data using tables, views and queries on pre-defined templates and filtered based on business requirements then, data is transformed and mapped

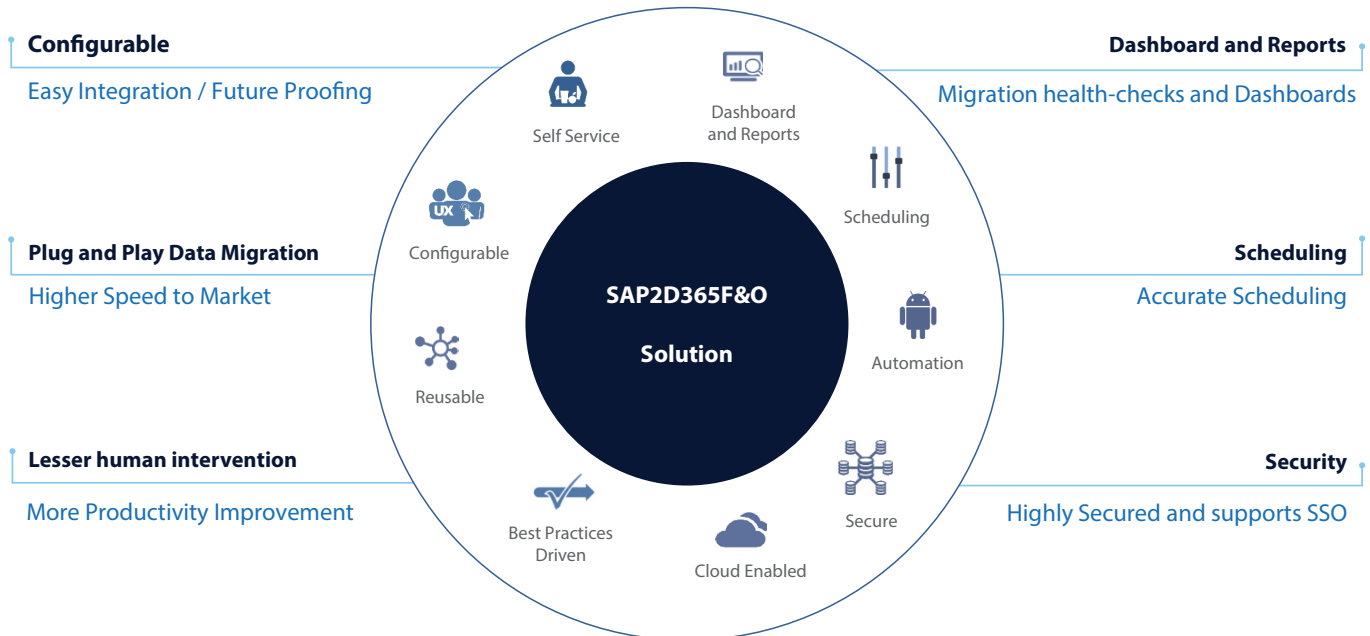

based on target table structures and loaded to destination.

The **reporting features** include features for assess SFDC customizations, reconciliation & validation during data loads, D365 Health Check assessment

The salient features of the solution which makes the tool user friendly and performs data migration with very less human intervention.

Overall, the migration workbench improves quality, reduces risk of the modernization program, reduces the cost/effort for all the applications by 20 - 25% and the implementation timelines are reduced by 20 - 25%. There are number of solutions in the market for migration for D365 CE, the SFDC2D365CE workbench is "made for purpose" for SFDC to D365 CE only.

## Key Features and Benefits which help address the challenges and differentiate the Solution

~35-40% reduction in duration of Data Migration along with ~20-25% reduction in overall duration of SAP Finance to D365 F&O Migration will result in ~30-35% savings in Overall Effort/Cost
