

INFOSYS SMARTMOVE – DYNAMICS AX UPGRADE SOLUTION

Accelerated Transition
leveraging Application
Modernization Services

Microsoft Dynamics AX has been an industry leading ERP application for many years. In past few years, with the upgrades and advancements to the product by Microsoft, advent of next-gen digital technologies and the digital-first approach the need for modernization has never been greater.

There are several challenges in continuing with AX, stemming from its end of life infrastructure, high maintenance cost, Rigid UI, longer development cycles, lack of business insights and moreover, an end of support from Microsoft by October 2021.

Infosys Solution to meet the challenge

Infosys MBAS practice has developed an AX Upgrade Solution built on our SmartMove framework for seamless, reliable, cost-effective migration from older versions of Dynamics AX to Dynamics 365 ERP. Our SmartMove framework for legacy modernization is a robust framework which helps accelerate legacy modernization across industries, functions and Lines of Businesses.

- There is no direct path for upgrade from AX 2009 to D365 FO and the 10+ year gap between AX 2009 and the current D365 ERP landscape, brings uncertainties and risks to an upgrade.
- Our comprehensive 3 step approach de-risks the upgrade journey and provides control and visibility to our customers.

Quick Investigation

Due Diligence

Migration

Quick Investigation

Quick assessment to understand the requirements

Diagnostic Quick Investigation Toolkit (QIT)

Due Diligence

Consulting-led assessment to define the Approach / Blue-print of the transition

Feature list comparison, business process maps

Migration

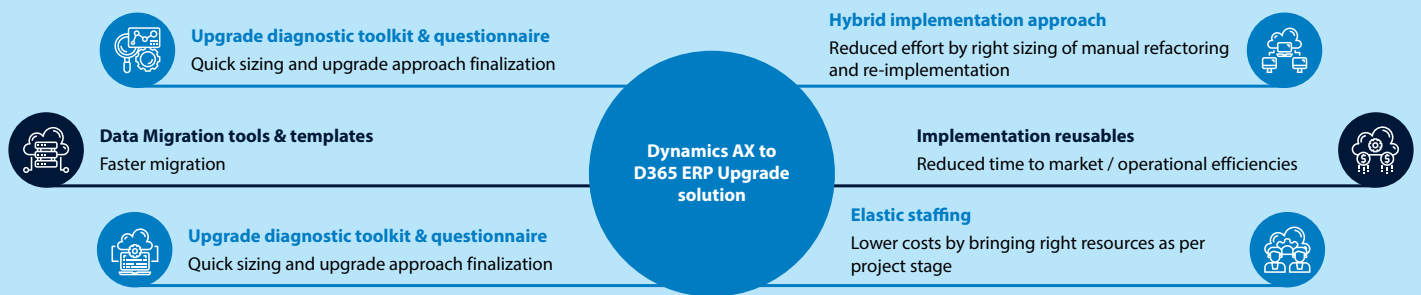

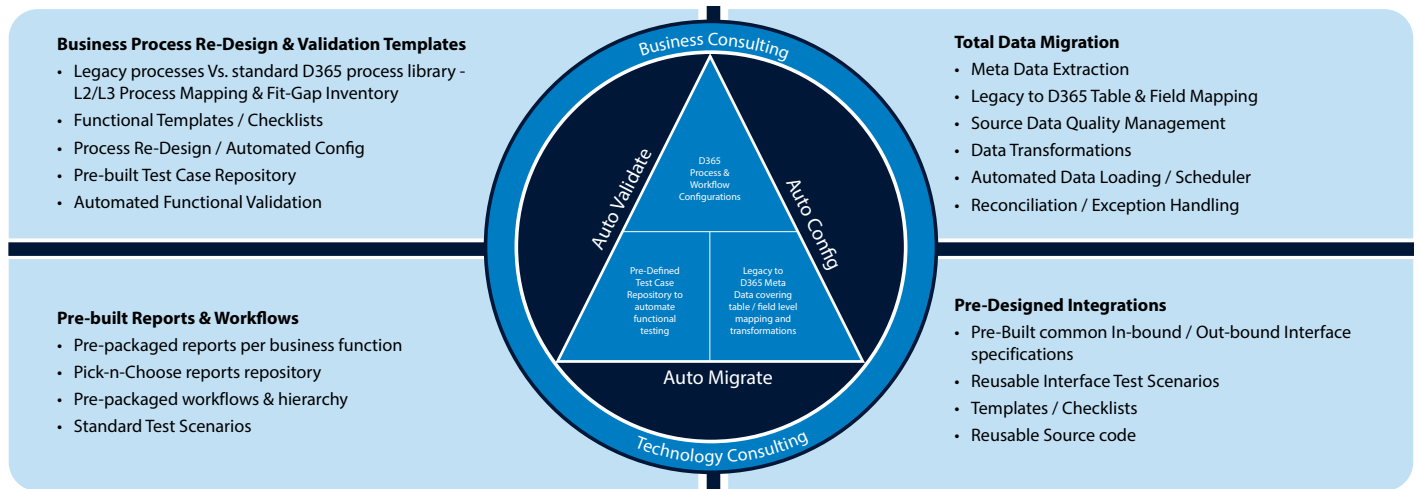

Manual refactoring, Re-implementation or Hybrid approach

Data templates, MS Data migration tool, Master Data Migration Scripts
