

Integrated Business –

An Infosys solution for establishing Integration Competency Center

If you are unsure that your EAI strategy is integrated to your business objectives, answer the following questions and decide:

- Are you able to extract maximum business value from EAI investments
- Is your EAI capable of responding to dynamic needs of the business?
- Is your Integration solution providing optimal performance and based on robust Infrastructure?

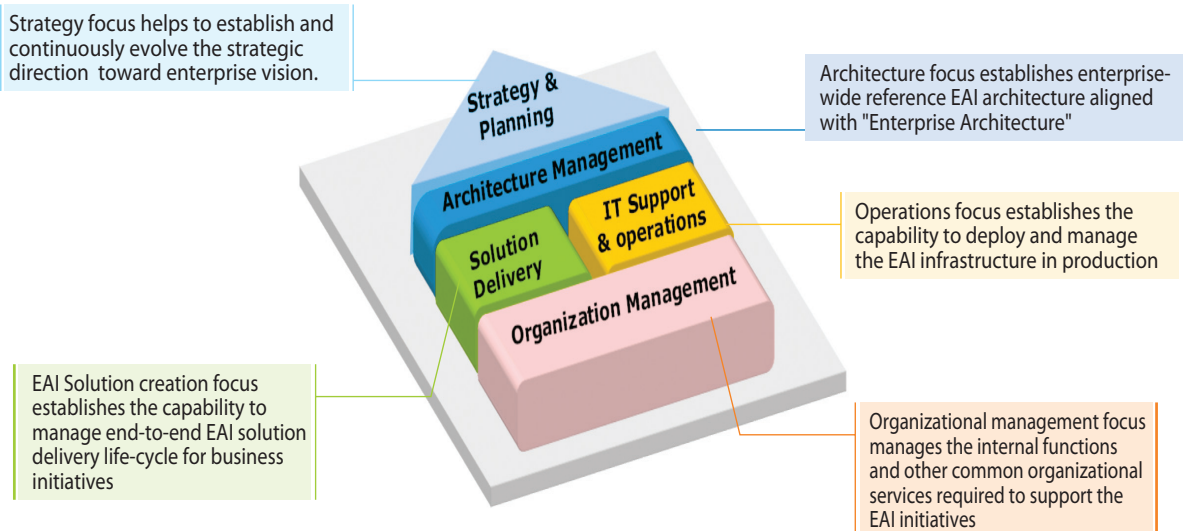

Integrated-Business is an integration competency center establishment solution, designed to enable organizations to extract business value out of their Integration Investments. It also establishes capabilities to manage all the integration needs within the organization by streamlining and standardizing the application integration activities across the organization. You get an “Enterprise view” of EAI with improved time-to-market and lower TCO; all delivered on-time, on-budget with [Infosys Predictability!](#)

Value Proposition

An enterprise-wide, structured, and well-managed framework for owning and adopting EAI would provide:

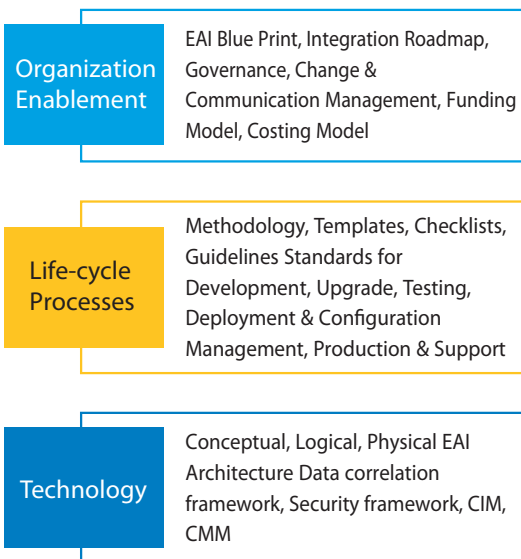

- **Business Alignment:** Business objective driven integration environment with increased visibility, informed and faster decision making
(Average saving of 25-30 % in development cost and 30-75 % saving in operations and maintenance cost can be expected - Giga)
- **Strategic Technology Ownership:** Due to EAI governance model, metrics & functional structure and a comprehensive funding & costing model
- **Higher Solution Quality:** Due to Efficient operational practices, improved quality and process performance
- **Lower TCO:** Due to Economies of scale, productivity gains & higher resource utilization from repeatable infrastructure
- **Lower Risk:** Agility and flexibility to manage changes in business and technology environment. Enables effective technology lifecycle management and faster maturity of integration

Infosys 'Integrated Business' Framework

Solution Snapshot

Infosys team uses its industry-proven enablers and tools that will help achieve the objectives of Integrated Business. Following is a typical solution snapshot covering basic dimensions: People, Process & Technology.

Success Stories

A leading telecom company in APAC region

had federated IT structure and had already implemented various EAI projects on TIBCO EAI platform. Despite that, client EAI competency was in reactive state. Infosys created enterprise level governance by establishing EAI as a domain and setting direct connection between business objectives and EAI solutions. It resulted in maximized opportunities for reuse, optimized development and production support services to reduce the total cost of ownership, improved operational efficiency and reduced complexity in EAI management allowing the client to spend more bandwidth on strategic evolution.

A leading Utility company in USA

had federated IT structure and had only single EAI project using Vitria for one of business units. Client has defined excellent Enterprise EAI architecture but most of the integration in past had been point-to-point. Though the client was looking for only technical competency building, Infosys proposed Competency Center establishment approach. The solution minimized people dependency, increased consistency and reliability into workproducts of EAI projects, ensured effective re-use of EAI assets and established easy-to-use ready-to-go project kits for EAI implementations. It lowered costs for EAI solution development and operations due to centralized governance and dedicated EAI team and aligned EAI to changing business needs constantly.

Allied services

Business Consulting

Provides you with strategic differentiation and operational superiority, assessments, proprietary industry analyses & projects structured around beating the competition.

Independent Validation

Gives your applications the third degree treatment and tests their robustness and ability to survive your business growth. A "must have" service if you are serious about long term leverage of your application assets.

Enterprise Application Integration

Make the whole of your IT applications much greater than the sum of its parts. Infosys leverages Global Delivery Model (GDM) to deliver immediate and dramatic productivity growth like no one else can.

Modular Global Sourcing

A strategically mature alternative to total outsourcing and ad-hoc offshoring. Align your sourcing strategy to your business strategy, modularize your applications and processes and leverage the power of Global Delivery Model (GDM).
