

## Achieving Inventory Visibility and Control with TIBCO Technology

Infosys and TIBCO deliver competitive advantage with inventory visibility, control, and responsiveness

### Client Challenges

*"We can not respond quickly to last minute orders: Too much component inventory needs to be consumed before we can switch over to a different product."*

*"Lack of visibility to key operational data at our outsourced manufacturing partners prevents us from accurately projecting inventory liabilities."*

*"We want to monitor and react, in real-time, to the huge data volumes on inventory flow and shipment status – our infrastructure's inability to deliver continues to raise problems of missed ship dates and product stock outs."*

### Infosys/Tibco Inventory Visibility and Control Solution

The Inventory Visibility and Control Solution drives competitive advantage via improved service levels, decreased inventory investments, and increased responsiveness by enhancing an enterprise's ability to control and balance inventory across supply, manufacturing, and distribution networks. The solution provides a platform for monitoring of inventory location and consumption data real time, and for managing events and exception conditions with alerts and workflow tuned to the needs of global, highly outsourced supply chains.

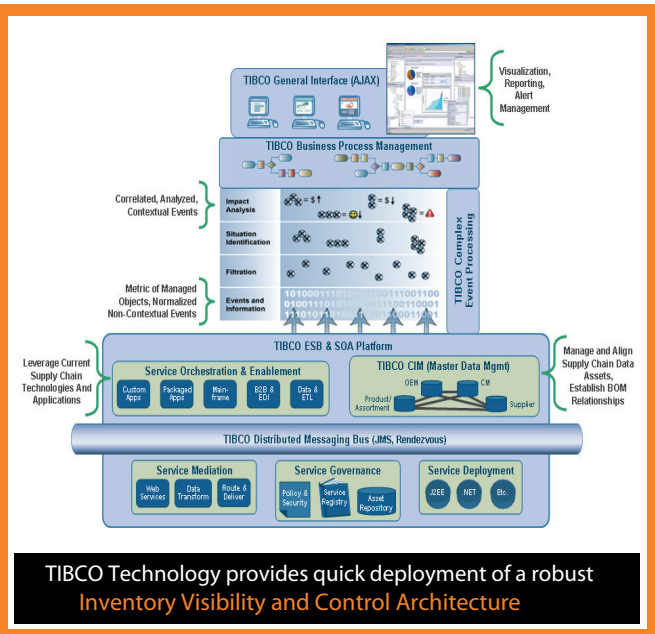

Benefits to Clients

The solution is metrics driven and provides the following benefits:

- End-to-end supply chain visibility enables problems to be spotted ahead of time
- Accurate, real-time measurement of actual performance against KPIs and SLAs drives continuous improvement

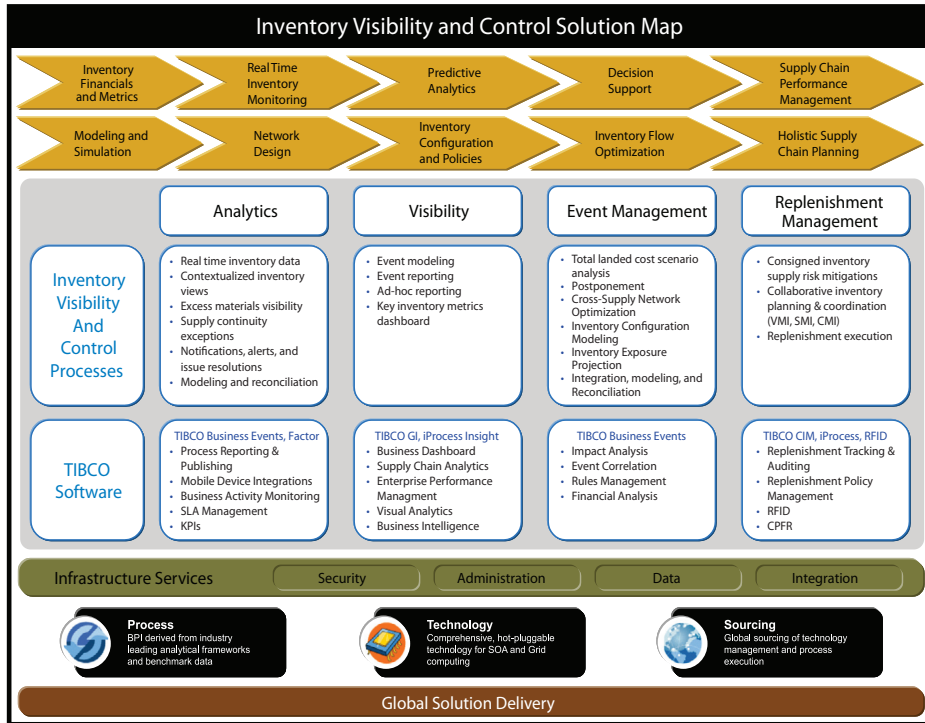

The screenshot shows a 'Virtual Control Center Dashboard' with a world map, a list of recent alerts, and several charts including 'Late Component Alerts', 'PLD Items - Alert Frequency', and 'Alerts By Geography'. A table at the bottom shows alert details with columns for Alert Type, Alert Count, and Avg Time / Alert.

The Infosys/TIBCO Inventory Visibility and Control Solution includes a pre-configured **Visibility & Exception Management Dashboard**

## Joint Value Proposition

Infosys is a TIBCO Global Alliance Partner, and recognized for its leading TIBCO BPM-EAI practice. Infosys and TIBCO partner on several initiatives critical to joint customers including the Early Adopter Programs (EAP).

Infosys has executed many large customer engagements involving TIBCO products. As an early development partner, Infosys developed and supported many of TIBCO's pre-packaged adapters used to integrate popular business applications.

Infosys' solutions and services for the high tech and discrete manufacturing industries are a result of our experience in multiple client engagements applying TIBCO technology to High Tech, Distribution, and Manufacturing industries and supply chain processes.

With proven experience mapping critical business best practices to TIBCO's Service Oriented Architecture (SOA), Business Process Management, and Master Data

Management technologies, Infosys helps define the optimal path for investing in supply chain benefits that are measurable, sustainable and repeatable.

Infosys proprietary methodologies combined with its pool of experienced TIBCO consultants enables high quality solution delivery and integration. The Infosys/TIBCO Inventory Visibility and Control Solution is built on an extensible, next generation SOA platform, delivering a perfect blend of complex event management, inventory tracking, reference data management, and process management, all presented in an AJAX-based user interface. This standards-based solution handles large volumes of real time event information, delivering inventory visibility and control across extended supply and distribution networks.
