

## Infosys' TIBCO Expertise

---

Infosys realizes the shift in enterprise IT towards adapting Service Oriented Architecture (SOA) and Business Process Management (BPM) principles to align closely with change in business landscape – making information system more agile. SOA and BPM provide agile processes and information systems to deliver the demands of business objectives.

Infosys, through its functional and technical expertise is working closely with partners like TIBCO to enable customers to leverage Enterprise Application Integration technologies for their business advantage.

### Infosys - TIBCO Strategic Alliance

Infosys is a [Global Consulting partner and a long-term Engineering partner for TIBCO](#) and has successfully executed large global implementations involving various TIBCO products.

Infosys is the only Early Adoption Program [EAP] Partner of TIBCO for the TIBCO ActiveMatrix product to enable clients to embark upon their SOA journey. Infosys is also setting up a joint solution centre with TIBCO to develop new generation solutions with focus on different industry verticals.

As a result of Infosys' strategic alliance with TIBCO, the clients benefit by

- Leveraging best-in-class TIBCO functionalities for their business advantage
- Effective technology lifecycle management and faster maturity of integration

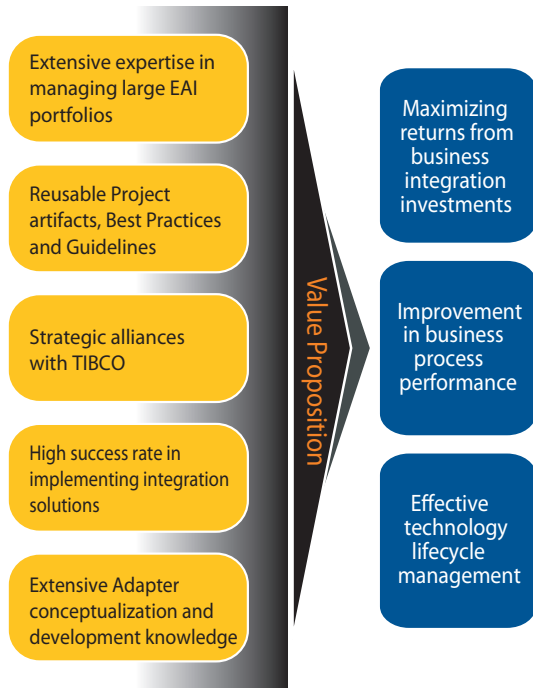

### Solutions and Services

Infosys provides end-to-end of Enterprise Application Integration (EAI) services ranging from consulting to operations, to the world's leading corporations.

- [Consulting Services](#) – Comprises of integration strategy definitions, package evaluations, EAI definition, SOA and web services adoption
- [Integration Business\\* Solution](#) – Helps to establish capabilities for complete integration needs of an organisation from people, process and technology perspectives (viz. governance model, funding model, processes and tools, architecture and technical frameworks)
- [Unified Account Opening Solution](#) – The Unified Account Opening solution reduces the cycle time to open new accounts. It improves customer satisfaction and reduces the risk and cost associated with customer abandonment during account opening.
- [Inventory Visibility & Control Solution](#) – This solution aims at providing inventory visibility across the extended supply chain through a highly interactive graphical user interface.
- [Application Integration Services](#) – Comprises of large scale implementations and roll outs, upgrade services and sustenance services.
- [Adapters and Frameworks](#) – Infosys custom develops adapters and technical frameworks for EAI implementations

## Value Proposition

## Success Stories

Infosys has worked with more than 50 global customers in the TIBCO-EAI space.

Infosys created a robust integration framework for business services and applications, using TIBCO, for one of the world's largest energy companies. In addition, Infosys was also involved in setting up and managing operations of an offsite 'Integration Factory' to facilitate delivery of integration projects through design, development, testing and implementation of integration components.

## Allied services

### Business Consulting

Provides you with strategic differentiation and operational superiority, assessments, proprietary industry analyses & projects structured around beating the competition.

### Independent Validation

Gives your applications the third degree treatment and tests their robustness and ability to survive your business growth. A "must have" service if you are serious about long term leverage of your application assets.

### Enterprise Application Integration

Make the whole of your IT applications much greater than the sum of its parts. Infosys leverages Global Delivery Model (GDM) to deliver immediate and dramatic productivity growth like no one else can.

### Modular Global Sourcing

A strategically mature alternative to total outsourcing and ad-hoc offshoring. Align your sourcing strategy to your business strategy, modularize your applications and processes and leverage the power of the Global Delivery Model (GDM).
