

TIBCO Practice

Building Smarter Organizations

Ever-changing global business environments are forcing the enterprises to constantly innovate and rapidly collaborate across locations. While trying to be nimble to stay competitive, they are hindered by the growing complexity of operations and silos of valuable experiential knowledge. IT-led innovation should simplify and create a single digital nervous system for the enterprises to enable faster flow of information. Traditional methods of knowledge exchange are increasingly proving to be ineffective. Technology is enabling people across the globe to collaborate, exchange thoughts and have an immersive experience in an informal learning environment. It is providing seamless collaboration by infusing the right person with the right knowledge at the right time.

Infosys' and TIBCO's enduring partnership delivers agile business transformation solutions for building smarter organizations. Deep industry expertise backed by robust architectural capabilities helps you meet the ever-changing needs and challenges of your businesses. Leverage the power of real-time knowledge to build a smarter enterprise.

Tomorrow can Start Now!

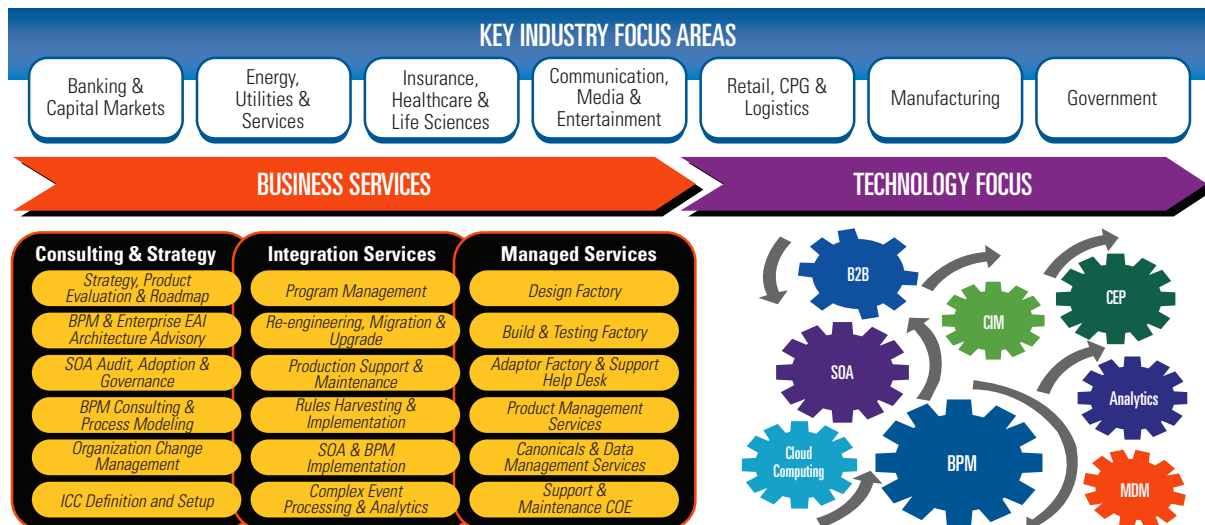

About the TIBCO Practice

- More than 170 successful engagements on TIBCO for Global 2000 clients across domains
- Talent pool comprising of 1200 TIBCO practitioners working on strong technical frameworks and methodologies
