

## In-Fusion (Infosys Fusion Enabling Methodology) and Fusion Accelerators

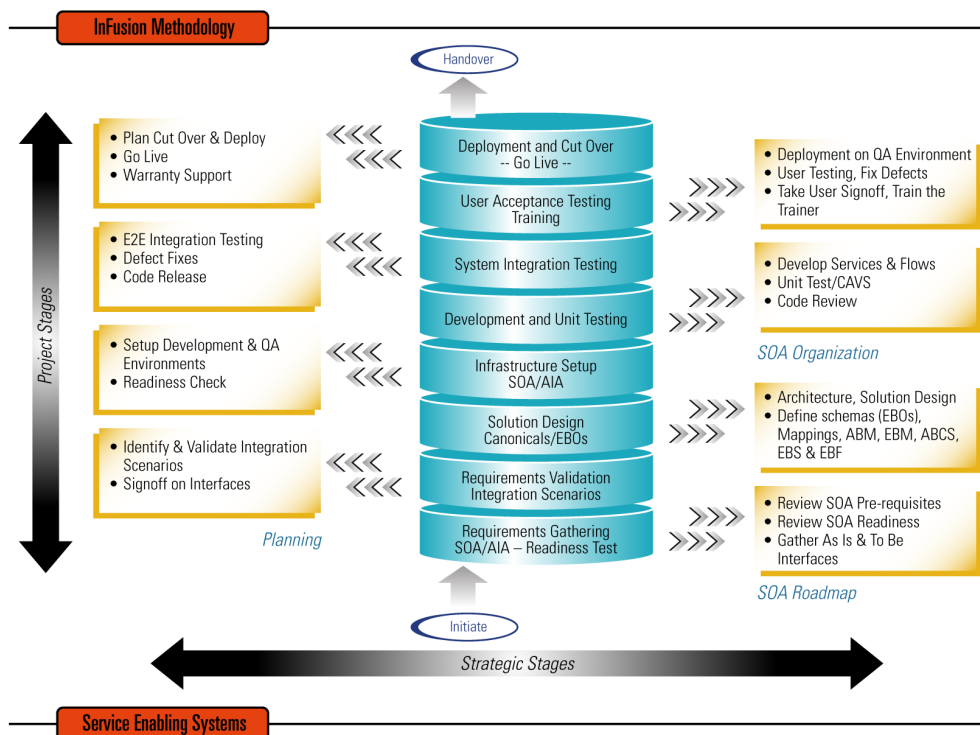

Infosys Oracle Service-Oriented Architecture (SOA) enablement methodology on Fusion (INFUSION) involves establishment of a SOA COE responsible for all aspects of SOA enablement of an enterprise in terms of maturity assessment, architecture, solution delivery and operations. Our team has worked on several engagements in different capacities starting from strategizing and implementing SOA to pure solution implementation based on SOA.

Each of the stages has well defined Entry Criteria & Inputs, Activities & Participants and Exit Criteria and Outputs ensuring various check-points throughout the lifecycle of the project.

**In-Fusion Stages** - In-Fusion divides the entire implementation cycle into two levels, the strategic level and the project stages.

STRATEGIC STAGES	PROJECT STAGES
<p>These are corporate level activities, in tune with the organization's vision and objectives. In the Planning Phase, the high level business requirements are understood, a strategic SOA Plan is prepared which outlines Information Architecture considering technological directions and IT Investments. In the SOA Roadmap Phase, options are generated and a particular roadmap is defined based on a given set of criteria. Business processes are redesigned so that the organization can realize rapid gains while minimizing the trauma of change. In the SOA Organizing Phase, the Project Management Organization, Change Management Processes, Knowledge Management Processes and SOA Governance Strategies are formulated.</p>	<p>These activities are specific to a project and can be tailored for site/location specific conditions. This level has been subdivided into distinct phases and is based on the Project Structure decided for the project.</p>

### In-Fusion Methodology

## Key Benefits of In-Fusion Methodology

<i>In-Fusion helps to achieve accelerated Service enablement of the Systems that involve Fusion Technologies using Oracle SOA/AIA framework in the overall picture of SOA realization.</i>	<i>This methodology provides a structured and phased approach to streamline the implementation, delineating a clear path for understanding, assessment, planning, executing, testing and supporting the implementation process.</i>
<i>Based on modular and flexible approach this methodology covers all stages of an end-to-end implementation, and is based on a deep understanding of requirements, managing the change imperative, the solution development phase, deployment and post-implementation support.</i>	<i>In-Fusion imbibes several years of our SOA realization experience in the Global Delivery Model resulting in a cost effective, resource optimized methodology to deliver high quality software within project deadlines.</i>

<b>Fusion Accelerators</b>	Our Key Pre-built solutions and accelerators which would ease integration efforts resulting seamless implementation are listed below
<b>ACCELERATORS</b>	<b>SOLUTIONS FRAMEWORK</b>
<ul style="list-style-type: none"> <li>• MRR Framework (Monitor, eprocess and Reconcile)</li> <li>• Automated Deployment Tool</li> <li>• Notification Framework</li> </ul>	<ul style="list-style-type: none"> <li>• <b>Demystify Fusion</b> – Build a business case on Fusion, with a proof of concept using our framework</li> <li>• <b>Inventory Visibility Control</b> – Increase inventory planning accuracy &amp; tighten inventory control through our IVC solution developed using Oracle FMW</li> <li>• <b>B2B solution Framework</b> – Integrate with your trading partners to achieve higher synergies using Oracle B2B</li> <li>• <b>ERP Revitalization</b> – Revitalize your ERP using building composite applications and realize SOA with Oracle Application Integration Architecture framework</li> <li>• <b>SOA for Manufacturing and Distribution companies</b> – Efficient Canonical Models built on the industry standards and leverage business process knowledge</li> </ul>

## Allied services

### Business Consulting

Provides you with strategic differentiation and operational superiority, assessments, proprietary industry analyses & projects structured around beating the competition.

### Enterprise Solutions

Our Enterprise Solutions help you automate your value chain using off-the-shelf packages. Our solutions span ERP, CRM, SCM and EAI. They help you to mitigate your risks, achieve faster returns and lower TCO.

### Trading & Risk Management

Provides deep business process knowledge with cutting edge technological capabilities to optimize information sharing, minimize exposure, and integrate business processes in trading operations.

### Enterprise Application Integration

Make the whole of your IT applications much greater than the sum of its parts. Infosys can leverage the Global Delivery Model (GDM) to deliver immediate and dramatic productivity growth like no one else can.

Building  
**Tomorrow's** Enterprise
