

## Migrate with Confidence

### Robust OS/DB Migration

The only thing constant in today's dynamic marketplace is change. Businesses must continuously adapt to a fluid environment in operational and technology requirements. Whenever there is a change - because of a merger or a de-merger, or because of re-negotiations of the hardware or the data center - the SAP platform (operating system and the database) also gets transformed. Businesses must also adjust to the constant improvements hardware and database vendors make in their offerings even as they take into account the market trends in the adoption of these products and the changing prices. Clearly, businesses need a seamless and trouble-free migration to help them deal with the change.

The platform of choice for the migration needs to be robust, scalable and efficient to accommodate the rapid growth in operations and align with the product strategy of the packaged software providers. Infosys can help you transform your platform with complete efficiency and cost-effectiveness using its large pool of OS/DB migration-certified consultants.

### Infosys Migration Methodology

### Client Successes Client Successes Client Successes Client Successes Client Successes Client Successes Client Successes Client Successes Client Successes

A leading Automobile giant needed to migrate its SAP R/3 46C system from HP-Oracle to AIX-Oracle and move the datacenter from Europe to the USA. The Infosys Migration factory leveraged the appropriate process framework to migrate the R3 46C system using the SAP migration tool - Migration Monitor and R3SETUP - for database export and import. The project was completed successfully within the committed downtime. Subsequently, based on the client requirement, Infosys successfully migrated the landscapes from AIX-Oracle to AIX-DB2.

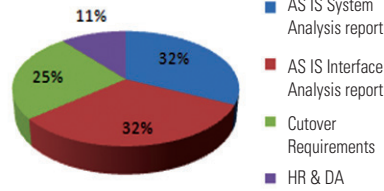

A major Financial Service Provider with operations in 154 countries was moving its datacenter and wanted to migrate its SAP and non-SAP applications from Solaris-Oracle to Windows-MSSQL. With 11 SAP landscapes in consideration, Infosys minimized the cost of the exercise by deploying its Global Delivery Model. Infosys utilized SAP migration tools such as Migration Monitor, R3SETUP and SAPINST for migrating the SAP BI (9 TB), SAP R/3 (4.5 TB), SAP SRM, SAP WAS 640, SAP MDM, SAP PI, SAP EP, SAP GTS, and SAP Solution Manager applications, along with other non-SAP Applications like Markview and Sabrix to the new datacenter. This project was completed successfully on time and within the budget.

## Infosys Migration Practice

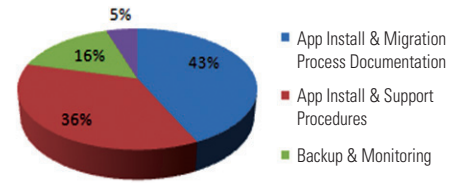

Infosys leverages its vast experience and deep knowledge gleaned from a number of successful migrations to create a well laid-out and easy-to-follow plan that leads you through a worry-less and seamless migration. Infosys consultants will set up your SAP system to make it run optimally on the dimensions of performance, availability and maintainability.

We will enable you to check in the planning phase whether the new system will fulfill your requirements for efficient operations by carrying out an assessment with standard tools. Infosys also ensures a secure migration of your data from the current environment to the target platform and ensures a smooth continuation of operations.

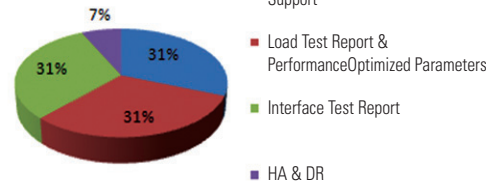

### Project Preparation

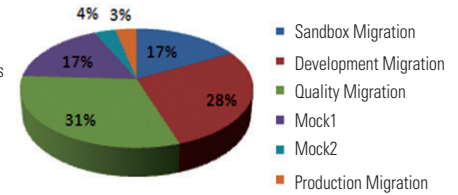

### Realization

### Testing

### Cutover

Infosys consultants bring to the table their expertise in performing SAP OS/DB migration services quickly and with precision. They leverage their past experience to steer your migration through all hurdles and navigate it to the target environment safely.

Infosys' team of SAP-certified migration consultants are equipped with sound knowledge on migrations from/to various operating systems and databases. The team deploys its vast experience in implementing technically robust operations of your new operating system and/or database at a very low cost while minimizing expensive system downtime.

The cost of unpredictability in IT-enabled business solutions is very high. Infosys gives you the predictability of:

DELIVERY

COMMITMENT

PERFORMANCE

By combining technology tools, methodologies, processes, knowledge management, and business insight, Infosys delivers not just a solution but peace of mind.

## Gartner

Infosys has been positioned in the leaders quadrant of Gartner's 'Magic Quadrant for SAP ERP Implementation Service Providers, North America.'

Authors: Susan Tan and Alex Soejarto. Report publication date: 2 November 2010.

According to Gartner, Inc., "Leaders are performing well today, gaining traction and mind share in the market; they have a clear vision of market direction and are actively building competencies to sustain their leadership position in the market."
