

BI Performer - SCOR based SAP BW solution

Driven by the need to pro-actively respond to a globalizing supplier base higher customer expectations, and increasing competition, supply chain organizations today are pushing the envelope to achieve higher levels of operational efficiency. The benefits of Supply Chain visibility solutions can be increased significantly by adopting the SCOR-model .

The SCOR (Supply Chain Operations Reference) model identifies the key performance attributes to be focused on for succeeding in this new paradigm:

- Customer-facing - reliability, flexibility and responsiveness
- Internal-facing - cost and asset efficiency

Understanding the advantages of the SCOR-model and identifying how existing Supply Chain processes relate to the model can increase the ROI on existing Supply Chain systems and visibility investments. By having a Supply Chain visibility strategy in place that can be synched with the SCOR-model, information can be effectively analyzed and efficiencies can be created that will deliver meaningful, measurable and actionable results.

Infosys' BI Performer is a SCOR-enabled pre-configured SAP BW solution; delivered through a user-friendly custom portal that gives you access to 194 ready-to-use performance reports-thereby helping you take pro-active action to improve supply-chain efficiency.

Infosys has enhanced SCOR model by providing industry benchmark values for various parameters that are enabled through SCOR. The SCOR defined metrics has been incorporated into a solution that leverages existing integration capabilities from multiple supply chain systems. This in turn increases the amount of supply chain data available to access. This solution can take advantage of well integrated systems as well as disparate systems that are not fully integrated by extracting the information needed, applying standardized calculations across multiple systems, and presenting a final output.

Solution Features

- SCOR-enabled pre-configured SAP BW solution
- User-friendly Custom Portal with drill-down facilities
- 194 ready-to-use Performance Reports
- Plug-and-play Logical Data Model
- Standardized Metadata
- Leverages Infosys' strong industry expertise

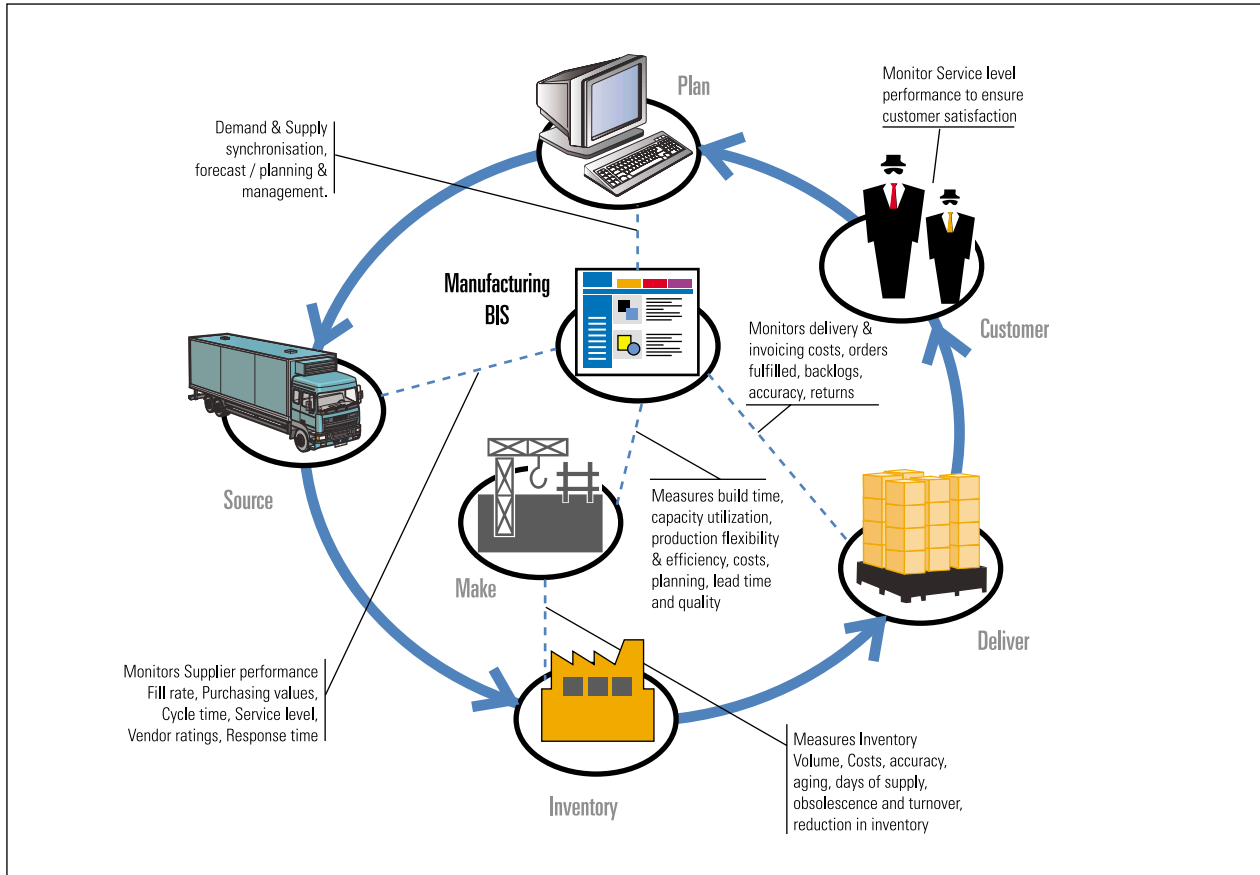

Solution Description

The BI Performer is a bundled SAP BW solution providing SCOR-based reports that enables improvement in supply-chain efficiency.

A user-friendly portal will guide business users through these reports thereby enabling them to analyze their supply-chain performance on demand. These reports can be downloaded into a spreadsheet or on to a web browser, for further analysis.

The robust logical data model uses standardized metadata, thereby allowing your business to seamlessly integrate the BI Performer with existing multi-system landscapes.

All in all, the BI Performer allows you best-in-class predictability and control over your supply chain processes.

Allied services

Business Process Outsourcing

We offer business process outsourcing solutions to our global clients by leveraging process, domain and people management expertise. We manage risk for our clients through a scalable, cost-effective and predictable delivery platform

Enterprise Solutions

We provide services and solutions spanning the enterprise value chain with focused groups aligned to products and functions built around centres of excellence. ES has delivered services and solutions in more than 28 countries spread across the globe.

Infrastructure Management Services

We ensure that IT infrastructure and application are managed and operated on a 24x7 basis, ensuring high availability to provide better business value with a reduced Total Cost of Ownership (TCO) in a shorter time frame, utilizing the Global Delivery Model (GDM) of Infosys.

Business Consulting

We help companies gain competitive advantage by linking operational advantage to shareholder value. We help clients transform their business through strategy, operations, marketing, and technology.
