

Notes Migration

The increasing use of the latest Microsoft Office suite by knowledge workers coupled with the advancements in the Microsoft messaging and collaboration platform, together with its lower TCO, provides the necessary thrust to move to the Microsoft environment. While migrating to the new technologies, it is essential to define components and architecture that provide the right fit to ensure an optimal target operational environment, which is both scalable and adaptable to changing business needs.

Infosys' [Notes Migration solution](#), part of the Catalytic IT solution suite, enables companies to define the right-fit components and architecture and migrate the entire portfolio of Notes technologies and applications to the Microsoft platform with minimal disruption to business. The solution is part of the Microsoft Migration Center of Excellence which has proven tools, automated processes, recognized best practices and award winning solutions successfully deployed by organizations worldwide.

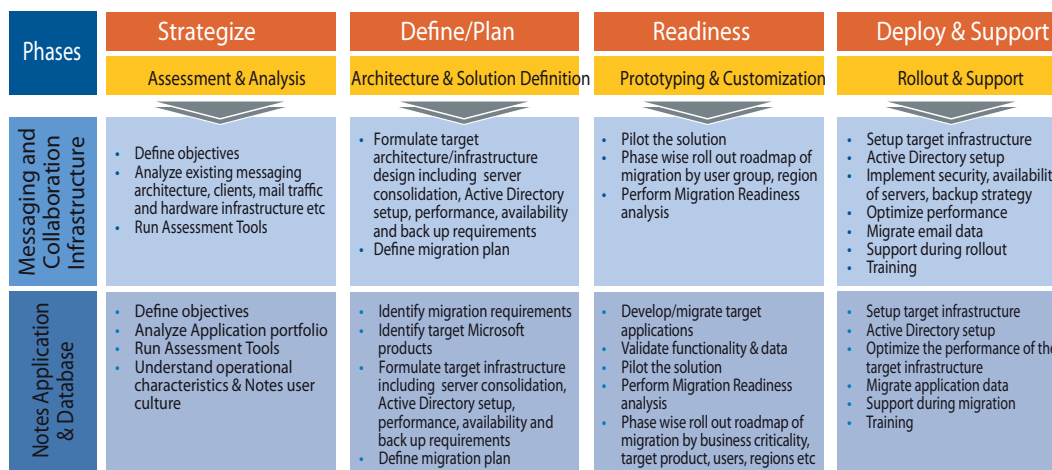

Notes Migration Stack

Infosys' two solution tracks provide migration expertise across the complete Notes stack:

Solution Track	From IBM/Lotus	To Microsoft
Messaging and Collaboration Infrastructure	Domino Directory	Active Directory
	Domino + Notes + iNotes	Exchange + Outlook + Outlook Web Access
	QuickPlace	Windows SharePoint Services
	Domino Everyplace	Outlook Mobile Access, Exchange Mobile Sync
	Sametime, Domino Unified Communications Services	Live Communication Server, Live Meeting
Notes Application & Database	Custom developed Notes application	Windows SharePoint Services, InfoPath, .NET
	Notes Templates	Windows SharePoint Services
	Lotus Enterprise Integrator (LEI) and Lotus Connectors	BizTalk Server, .NET
	Domino.Doc	Windows SharePoint Services
	Lotus Domino Designer	Visual Studio.NET, InfoPath
	Lotus Workflow	BizTalk Server

Infosys Notes Migration Methodology

Infosys methodology is well suited for re-engineering the Lotus Notes platform. We have fine-tuned the Software Development Life Cycle (SDLC) methodology to assess your migration impact and ensure a seamless, risk-free migration.

Infosys' Proprietary Tools for Notes Migration

Infosys' Notes Migration tools and Global Application Factory automate the migration process, accelerate migration timelines and achieve higher productivity and scalability with minimal disruption to business.

- **Domino Assessment Tool** - Gathers the complete information of the Notes applications and Domino messaging environment of an organization.
 - **Generic** – Data on Domains, Servers and Users
 - **Application related** – Database size, number of documents, usage data, technical complexity, recommendation for target migration platform
 - **Messaging environment** – Mail databases, size quotas, groups, server tasks
- **Migration Dashboard** – The features of this tool are:
 - Graphical view of migration status of servers, mailboxes, public folders and distribution lists based on each location.
 - Migration scheduling of all the entities.
 - Excel reports generated for all the required statistics.
 - User management – Authentication of each user and role based access.
- **Data Migration Tool** – extracts data from .nsf files and maps it to the table structure in target RDBMS. This data is then cleaned and transformation rules applied, before it can be consumed by SQL Server.

Credentials

- For a leading Swiss agriculture and crop protection firm Infosys migrated the entire portfolio of Notes applications to the Microsoft platform. This resulted in consolidation of various applications and the retirement of a few applications. It also helped the firm to standardize its operating environment across locations, thus reducing the TCO.
- For a Health Insurance major in the US, Infosys studied the Notes collaboration environment, migrated Notes data and several applications to the Microsoft platform and also enabled access to all the Exchange solutions over the web. This migration resulted in the consolidation of the workflow environment and saving on infrastructure and licensing costs.

Benefits of Infosys Notes Migration Solution

- The solution covers all aspects of Notes to Microsoft migration
- Accelerates migration timelines through proprietary tool sets and automation
- Minimal impact to existing environment
- Leverages Infosys' expertise in migration to the Microsoft platform
- Mature change management strategy

Catalytic IT

Catalytic IT enables enterprises to transform their business by leveraging IT as a catalyst. The portfolio of Microsoft technology integrated solutions and services under Catalytic IT enables enterprise businesses and their employees to realize a simplified, flexible IT environment that lowers the total cost of ownership and allows rapid change and innovation.

Allied offerings

Infrastructure Consulting

An ever-changing IT environment requires businesses to simplify the process for creating and managing IT infrastructure, while optimizing the cost of operation. Our services include environment design, capacity planning, consolidation, storage design, performance engineering and business continuity.

Application packaging

Infosys enables you to standardize and streamline the complete application packaging process. We deliver and manage these packages from global locations, increasing reliability and IT productivity and reducing desktop management costs.

Infrastructure Optimization

Infosys partners with your enterprise to optimize your IT infrastructure and transform it into a strategic asset, reducing total cost of ownership (TCO) and significantly boosting return on investment (ROI).

Technology Consulting

We work with you to architect, develop and implement solutions that help you leverage technology to enable business strategy. Our solutions help you make your IT more effective and better aligned to your business.

Building
Tomorrow's Enterprise

About Infosys

Many of the world's most successful organizations rely on Infosys to deliver measurable business value. Infosys provides business consulting, technology, engineering and outsourcing services to help clients in over 30 countries build tomorrow's enterprise.
