

Infosys iMigrate

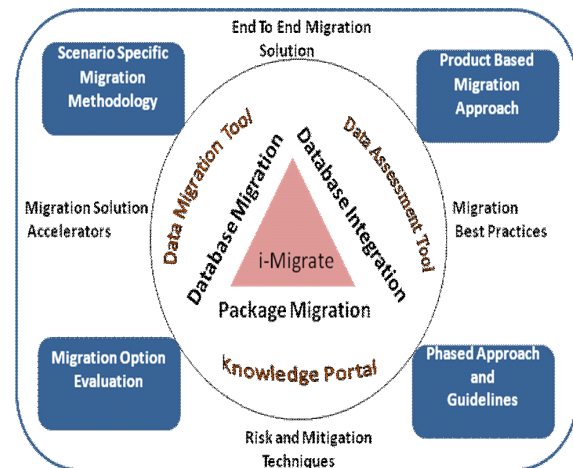

Data Migration Tool for Microsoft Dynamics™ AX and CRM

Infosys iMigrate is a data migration tool for Microsoft Dynamics AX and CRM. It is an automated tool which helps in increased productivity, reduced cutover time, enhanced quality.

It is a wizard based tool available to all partners which helps to migrate and integrate data from different data sources into Microsoft Dynamics. It is an easy to use tool and enables even a non-technical resource to do data mapping and perform end-to-end data migration and integration activities.

One of the features the tool performs is an incremental data migration helping the activities to be broken into multiple jobs in case of huge data migration. It can migrate/ integrate both Master and Transactional data along with maintaining all referential integrity constraints, de-duplication checks and any other validations needed by business.

It's a one-stop shop to capture all data migration activities including Extraction, Transformation and Loading. It provides real-time statistics of number of rows migrated, rejected and left to be migrated.

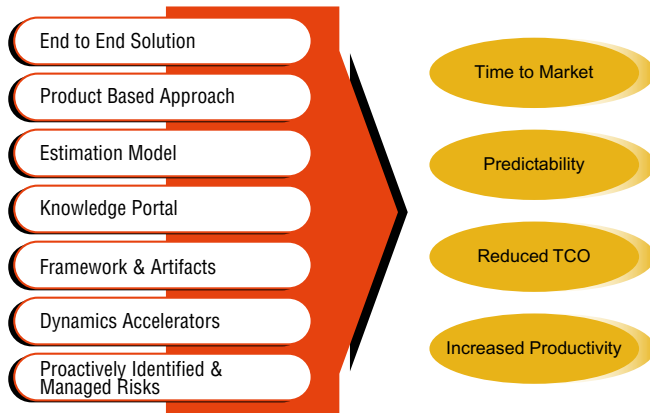

Infosys iMigrate Client Examples

- Data migration from multiple instances to an integrated corporate model for an U.K. based large telecom service provider
- Data assessment and data profiling of production data in 13 countries for an U.K. based telecom service provider
- Data migration from a packaged application to Infosys banking solution 'FINACLE' for a leading European bank
- Data migration from Oracle older version to newer version for an ERP package migration

Infosys iMigrate Solution Benefits

Infosys iMigrate is a data migration tool for Microsoft Dynamics AX, CRM. It provides wizard-based, easy to use tool for non-technical resource to migrate data from the different data sources into Microsoft Dynamics CRM and AX.

- **Auto mapping, Data Source to Microsoft Dynamics CRM and AX mapping:** Provides the mapping feature which can be used to map multiple data sources to MS Dynamics CRM and AX entities
- **Microsoft Dynamics CRM and AX Metadata lookup:** Provides the complete schema information of Microsoft Dynamics CRM, AX and the source databases for efficient and easy data migration
- **Advanced Error Handling:** Provides the real-time information of the records that are rejected along with the reasons for rejection. Allows the user to correct the specific data and migrate it again
- **Incremental Data Load:** Provides the capability to either append or update the existing records while doing the data migration
- **Creates Integration Window Services:** Generates the .NET code for creating the windows services which can be used to perform the data load from the legacy systems on regular intervals
- **Scheduler:** Provides the sequencing and the grouping of different migration activities
- **Pick List Automation:** Microsoft Dynamics CRM pick list is automated by storing all the pick list values in the staging area and configuring them through auto-mapping feature
- **Advanced Transformations:** Provides the plug-in adapters that can be used to extend the transformations generated through Infosys iMigrate wizard

- iMigrate is a tool that offers the technique of 'How to Migrate' data in an efficient and cost effective manner. It is a structured approach broken down into simple phases, sub-phases and activities to enhance repeatability and improve predictability
- iMigrate includes a solution workbench to profile, estimate, and model, execute and test migration of data

Infosys - Microsoft Alliance

Infosys' strategic alliance with Microsoft brings together the innovative technologies of Microsoft and the integrated services delivery capabilities of Infosys to deliver tangible business value to clients.

Steve Ballmer, CEO, Microsoft Corp, commenting on the alliance, "Microsoft and Infosys share a commitment to helping customers use technology to improve every area of their business, from process excellence to connecting with customers to responding effectively to the competitive landscape. Microsoft's long-term focus on delivering an integrated, manageable and reliable platform, combined with Infosys' unique delivery model and deep consulting skills, is designed to help customers succeed and grow through increased efficiency, cost savings and business value."

Microsoft Dynamics Practice at Infosys

Microsoft Dynamics Practice at Infosys provides consulting, package evaluation, product licensing, implementation, support, maintenance and upgrade services for Microsoft Dynamics Ax, Great Plains, Navision and CRM product suites from Microsoft. These offerings are delivered by Microsoft certified business consultants and world-class solution architects, through the Infosys pioneered Global Delivery Model. The Practice has established the innovative Global Competency Center (GCC) within Infosys, which creates an ecosystem to bring together Clients, Partners, Microsoft and Infosys under an integrated model for mutually beneficial coexistence.

Allied Services

Business Consulting

Provides you with strategic differentiation and operational superiority, assessments, proprietary industry analyses & projects structured around beating the competition.

Independent Validation

Gives your applications the third degree treatment and tests their robustness and ability to survive your business growth. A "must have" service if you are serious about long term leverage of your application assets.

Enterprise Application Integration

Make the whole of your IT applications much greater than the sum of its parts. Infosys leverages Global Delivery Model (GDM) to deliver immediate and dramatic productivity growth like no one else can.

Modular Global Sourcing

A strategically mature alternative to total outsourcing and ad-hoc off-shoring. Align your sourcing strategy to your business strategy, modularize your applications and processes and leverage the power of the Global Delivery Model (GDM).
