

Infosys' Oracle Applications Practice

Infosys combines technical and industry leading practices to deliver successful business solutions and enables maximized return on investments for your Oracle applications. Leveraging its extensive experience across the various Oracle applications and rich domain expertise, Infosys enables you to use Oracle applications for your business advantage.

Infosys' Oracle Applications practice provides Oracle consulting services to the world's leading corporations across various industry verticals. Equipped with robust tools, methodologies, templates and accelerators and supported by an Oracle Center of Excellence, Infosys' Oracle practice ensures that the customers get robust implementations, faster rollouts, de-risked upgrades, dependable production support and best quality development.

Credentials

- Over 50% Y/Y growth over the last 5 years
- Over 350 large Oracle applications engagements spanning across more than 40 countries over the last 4 years
- Over 75 full cycle implementations over the last 3 years
- Working with more than 75 Fortune 1000 customers across the globe
- Expertise across a range of Oracle applications including Oracle E-Business Suite, Oracle's PeopleSoft Enterprise, Oracle's Siebel CRM, JD Edwards EnterpriseOne, JD Edwards World, Oracle Transportation Management (G-Log), Oracle Communications Billing and Revenue Management (Portal Software), Hyperion and Oracle Retail (Retek)

Oracle Alliance

Infosys is a Global SI partner of Oracle and is a Certified Advantage Partner (CAP) which is the highest level of partnership in OPN. Infosys – Oracle relationship encompasses joint solution and product development to deliver incremental, differentiated value to customers across various industries. This relationship with Oracle gives Infosys -

- Early access to new product releases, including beta versions which enables us to create focused solutions built around the new modules and also upgrade solutions built on the earlier versions of Oracle Applications which will help clients obtain higher returns on their investments in the new Oracle applications

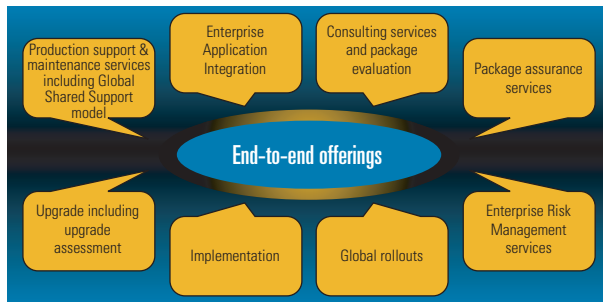

Infosys works closely with Oracle across the globe and has deep industry experience across Retail, High-Tech, Manufacturing, Healthcare and Telecom markets.

Key success stories

Infosys partnered with a large global conglomerate - that brings together technology and engineering to provide innovative solutions for its customers in a wide range of industrial, commercial, and consumer markets - to offer Global Shared Support Services (GSSS) for two of its subsidiaries. The project involved supporting Oracle E-Business Suite Financials, Manufacturing, Projects, Supply Chain, I-modules, Discoverer, as well as Oracle Portal part of the Oracle Fusion Middleware family of products and CRM modules. Currently, there are 9 companies and 2000+ users across the U.S. and Canada under the Global Shared Support Services model. Infosys' GSSS model is being effectively used for regression testing as and when new companies join the instance. The system has led to increased scalability, improved resource management and well documented information on processes across the instances.

Infosys streamlined the procurement processes of a large Utility company by deploying Oracle Advanced Procurement Suite of Products (Purchasing, iProcurement, iSupplier Portal, Sourcing, Procurement Contracts, Services Procurement, Daily Business Intelligence-DBI), combined with a custom Contract Cost Tracking Module. This is expected to lead to a savings of over 100 Million USD over a 5 year period by reducing maverick purchases, ensuring higher level of contract compliance, automation of low cost spend and productivity improvements

Infosys Transformation Order Management Solution

Infosys Transformation Order Management Solution (ITOM) gives companies a competitive advantage by reducing order processing costs, maximizing revenue and profitability in the order management cycle even while enhancing customer and partner satisfaction. ITOM is enabled by the combination of benchmarking against leading practices and metrics, flexible technology deployment that leverages existing IT investments and outsourcing.

Health Interoperability Platform

The Health Interoperability Platform (HIP), an integrated component of Infosys' EHR/PHR solution, is a standards compliant solution for building Collaborative Health Information Exchanges to support Intra-

and Inter-organizational Electronic/Personal Health Record initiatives. It provides an efficient mechanism to create a 360-degree view of clinical information in provider, payer and Regional Health Information Organization (RHIO) environments. The HIP solution provides a mechanism to aggregate, transmit and exchange clinical data across enterprises, and thereby helps healthcare organizations to improve patient care, safety and quality, and reduce preventable medical errors and costs.

The HIP solution leverages Oracle's Health Transaction Base® (HTB) which is a central health information hub that provides access to all appropriate clinical information for a given set of users.

Oracle Upgrade Solution

To keep pace with the changing market dynamics, you need to make sure that your Oracle applications are capable of supporting your business objectives. Upgrading Oracle applications using an approach that presents a roadmap to the end-state would ensure that business processes are consistently linked to business goals and customer requirements.

Infosys' Oracle upgrade solution will enable your organization to extract maximum value from your new and existing Oracle investments. With its unique de-risking approach, the Infosys upgrade solution is capable of qualifying the strategic, financial, operational, and technical impacts on your existing enterprise application landscape.

Client speaks

Infosys is a different kind of consulting firm, their conceptualization and excellent execution is their secret sauce. Its methodologies and models are instrumental in guiding us in the direction of success.
