

## Enterprise Asset Management

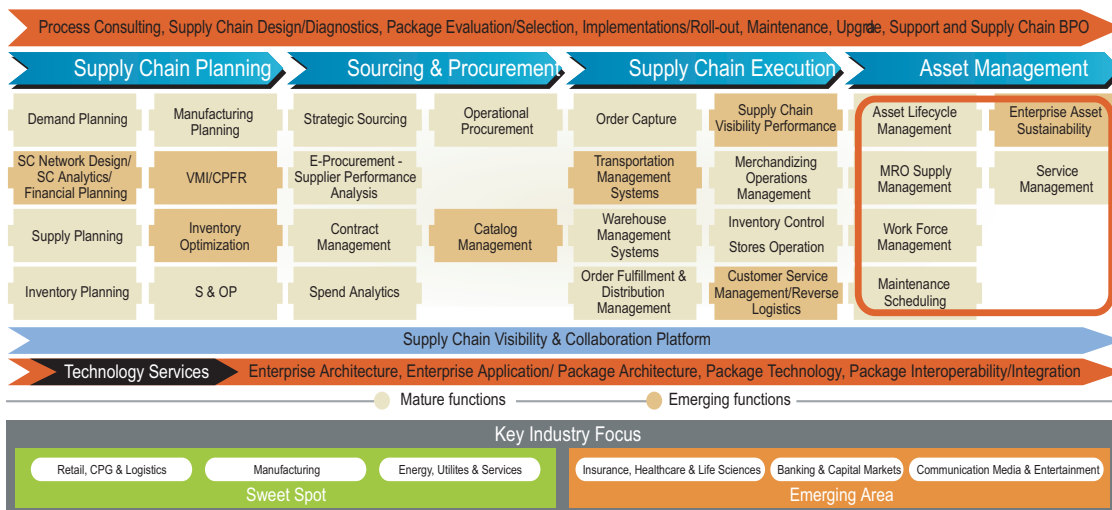

To remain successful in the backdrop of complex market dynamics, large enterprises have recognized that critical organizational assets have a direct and significant impact on corporate performance and profitability. Organizations across multiple industries have implemented and utilized Enterprise Asset Management (EAM) solutions for effective asset management. Waves of changes brought about by deregulation, globalization, restructuring and changes in environmental and safety norms have further increased the importance of effective EAM to drive higher corporate performance. When Maximo is integrated with ERP Systems and/or complementary solutions such as Mobile Solutions, RFID, or GIS, companies are able to reduce maintenance costs, increase asset utilization and maximize the Return on Assets.

Infosys can help you build strategic differentiation and operational superiority by configuring and implementing an EAM solution.

### Enterprise Asset Management Credentials

- Strong EAM domain knowledge and over 2500 person months of experience in the multiple EAM packages like Maximo, Oracle EAM and SAP EAM with extensive experience across multiple industries including Energy, Utilities, Telecom, Transportation and Aerospace & Defence
- IBM certified Maximo 7 ITAM & EAM Deployment Professionals
- Global solution partner with IBM
- Successful track record of executing complex, globally dispersed projects through GDM (Global Delivery Model)
- Strong credentials in Maximo 4.x, 5.2, 6.2 and the latest version 7.1
- EAM CoE (Centre of Excellence) focusing on bringing in Thought Leadership in the EAM domain, and in building Tools, Accelerators & Solutions to ensure quality delivery and customer delight
- Automated Tools and Accelerators built by the Infosys Center of Excellence to ensure faster go-live and quicker recovery of investments for Maximo upgrade projects
- Expertise in providing unique value in implementation, upgrade / enhancement, roll out and support

### Service Offerings

### Client Speak

"They (Infosys team members) are exceptional experts in their field and have excellent work ethic to go with these skills. We are very lucky to have such a great team of stars from Infosys. I am very proud of the work the entire team has done in getting us through Design. I am very proud to be part of such a great team. I am also very happy with Infosys' leadership with us on this project"

- Program Manager, Global MAXIMO Program, Oil & Gas Major

## Key Differentiators: Solutions & Accelerators cutting across EAM function

Work Safety Management	Complimentary MXES add-on solution for "Permit to work" business process that seamlessly interfaces to the core MXES Work Management Solution
RFID enabled Returnable Asset Tracking Solution	Returnable asset tracking solution that yields greater asset visibility and better inventory management
Performance Tuning Framework	Methodology and Go-live checklist to ensure Optimum performance for an enterprise scale MXES deployment
Influx Business Process Model-POC for Oil and Gas	Structured approach for business process modeling and requirements gathering repository of requirement model with version control capabilities that can be utilized through SDLC
RFT based data loading for M	Automated data upload approach that ensures data integrity by carrying out all validations from Maximo screens
Upgrade Solution	Infosys solution for migrating from Maximo 4.x to Maximo 6.x or Maximo 7.x which will help in faster turnaround for upgrade cycles
Condition based Monitoring	Automating monitoring – based maintenance process by interfacing MAXIMO with PLC/Automation system based on the measurement values (for example temperature, vibration, pressure etc), when one or more of these thresholds exceed the system triggers a maintenance activity automatically
Architecture & Infrastructure Framework	The approach ensures that there is "modular" scalability being built right through the detailed design and construction phase
Business Process Maps	Achieve quicker technical scoping for configuration or customization and prioritization of change management based on narrowed down processes

## Client Success Stories

CLIENT	SOLUTION PROVIDED	BENEFITS
Global Oil and Gas major	Infosys services encompassed implementation and roll out of a global instance consolidation strategy and formulated a global support model for production support of Maximo Enterprise Suite (MXES)	<ul style="list-style-type: none"> <li>Infosys solution helped streamline the client's business processes by establishing common procedures at all their global locations.</li> </ul>
Large Super market Chain	Implemented Oracle EAM solution with focus on standardization and solution reusability across regions.	<ul style="list-style-type: none"> <li>One common application to track maintenance activities across the Organization thereby replacing stand alone tools and applications.</li> <li>Streamlined business processes across organization to leverage the synergies of their maintenance operations.</li> </ul>
Integrated Energy Company	Implementation of Maximo solution for a robust and automated Procure to Pay process	<ul style="list-style-type: none"> <li>Automated the Procure to Pay process with optimized workflow and standardization of payment process across the organization.</li> <li>Provided wider scalability and clarity for future expansions /support.</li> </ul>

Our services are enhanced by the following:

### Business Consulting

Provides you with strategic differentiation and operational superiority, assessments, proprietary industry analyses & projects structured around beating the competition.

### Independent Validation

Gives your applications the third degree treatment and tests their robustness and ability to survive your business growth. A "must have" service if you are serious about long term leverage of your application assets.

### Enterprise Application Integration

Make the whole of your IT applications much greater than the sum of its parts. Infosys leverages Global Delivery Model (GDM) to deliver immediate and dramatic productivity growth like no one else can.

### Modular Global Sourcing

A strategically mature alternative to total outsourcing and ad-hoc offshoring. Align your sourcing strategy to your business strategy, modularize your applications and processes and leverage the power of the Global Delivery Model (GDM).

Building Tomorrow's Enterprise

### About Infosys

Many of the world's most successful organizations rely on Infosys to deliver measurable business value. Infosys provides business consulting, technology, engineering and outsourcing services to help clients in over 30 countries build tomorrow's enterprise.
