

Forecast TO Plan solution (F2P)

Enterprises across verticals are realizing the need for enhancing their demand management and planning capabilities to provide higher customer satisfaction.

Oracle demand planning (Demantra) and Oracle APS suite address these requirements but we at Infosys have observed important gaps in prioritizing demand and importance of a plan output which provides voluminous complex data with minimum usage of system resources

What is Infosys F2P proposition?

Infosys introduces the F2P solution targeted towards enterprises who feel the need to prioritize demand and have a single platform from which they can extract critical planning related information.

Flexible solution

Enhances the time to implement Oracle planning modules using pre-built, but configurable demand prioritization parameters, simultaneously providing you various plan analysis reports

Unified View of Plan

Interweaves various data elements providing you a single unified view in real-time eliminating information silos.

Minimum investment and customizations

Our solution integrates into the overall architecture of Oracle APS and Demantra catering to the tactical and operational information needs for planning and execution.

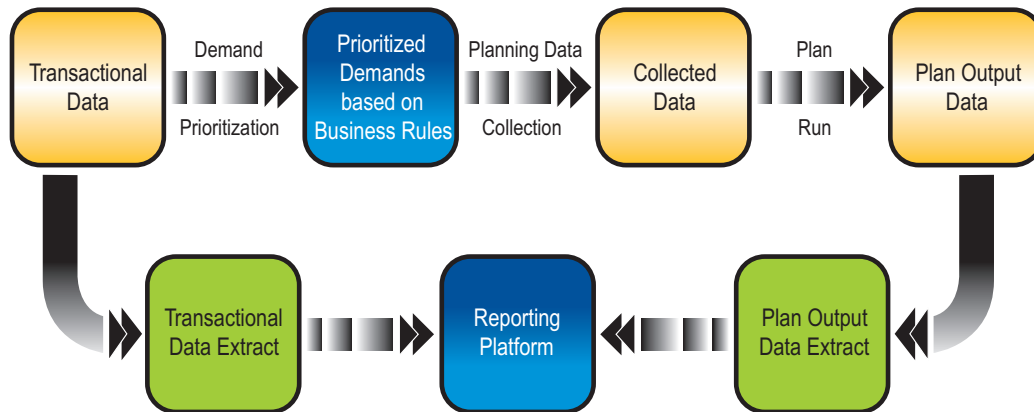

Benefits you derive from F2P solution

- Dashboards, automated exception management and alerts which provide quick response to changing market conditions
- Web-based, real-time internal and external collaboration with role-based security
- Rapid implementation and greater ROI
- Improved supply chain profits
- Reduction in demand replenishment delays
- Reduction on over all Supply Chain Cost
- Reduced inventory levels
- Improved Production Levels

Key Features	Enhanced Prioritization rules and Configuration
	Information of executed orders
	Multi-org demand supply View
	Category level demand supply aggregation
	Multi UOM Support in Plan out-put
	Plan Comparisons
	Improved Resource utilization information

Technical Architecture

Availability of planning and transactional data in one single platform is achieved using the following architecture

Beneficiaries of F2P

- Large Semiconductor Major in Japan needed better demand management and inventory visibility. Our F2P solution has been a part of the overall solution which is being used by the client for the past few years. The solution helped the client experience better demand management and improved inventory visibility.
- Leading energy and utilities major in Europe faced challenges in their global material visibility and global integrated plan. Our F2P was one of the key components in the overall solution provided to the client which helped the global planners and plant planners by improved material inventory visibility and reduced plan variability.

Allied services

Business Consulting

Provides you with strategic differentiation and operational superiority, assessments, proprietary industry analyses & projects structured around beating the competition.

Independent Validation

Gives your applications the third degree treatment and tests their robustness and ability to survive your business growth. A “must have” service if you are serious about long term leverage of your application assets.

Enterprise Application Integration

Make the whole of your IT applications much greater than the sum of its parts. Infosys leverages Global Delivery Model (GDM) to deliver immediate and dramatic productivity growth like no one else can.

Modular Global Sourcing

A strategically mature alternative to total outsourcing and ad-hoc offshoring. Align your sourcing strategy to your business strategy, modularize your applications and processes and leverage the power of the Global Delivery Model (GDM).
