

## Rapid Design Tool (RDT)

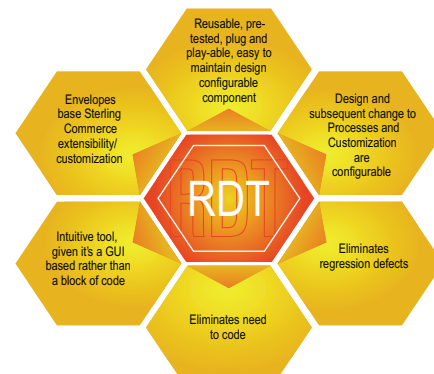

Does a high degree of customization during implementation often lead to increased cost and time to implement?

Are your customizations visible, plug and play components with minimum coding?

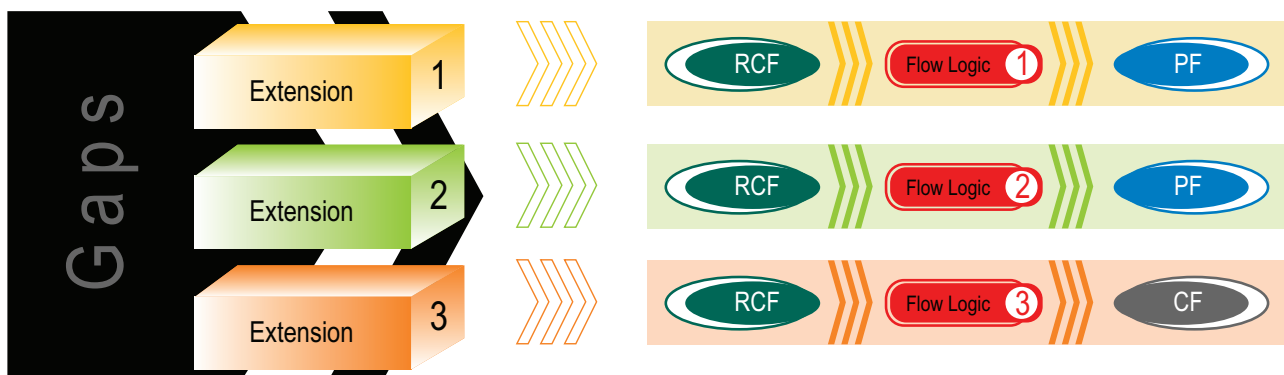

Historically most implementations need significant customization to meet customer's business requirements. The estimated product fitment range is 65% to 85%. The implementation time ranges anywhere between 3 months to 2+ years depending upon business process complexity. An efficient and effective extension approach is therefore crucial to ensure that the customer's time, resources and money are well spent.

### What are RDT solution's salient features?

Infosys' Rapid Design Toolkit is integral to the pursuit of Infosys' service delivery differentiation. The java technology based plug-in, developed by the SCM Center of Excellence (CoE), is the advantage lever, unifying perspectives of functional consultants and Java developers around a single solution creation toolbox. This disengages the solution design from the realms of technology complexity and refines customizations. The resulting closer to the box extension drives down TCO while increasing the value of the "buy over build" decision RDT is built on Sterling Commerce Suite's plug & play framework.

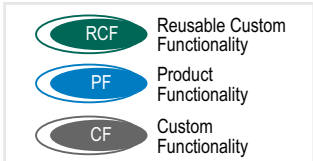

### RDT Framework

Extensions have been broken down in functional modules

The invention is around abstracting the boundaries of the functionality such that extensions become recompose-able through Sterling Commerce Suite's plug & play framework.

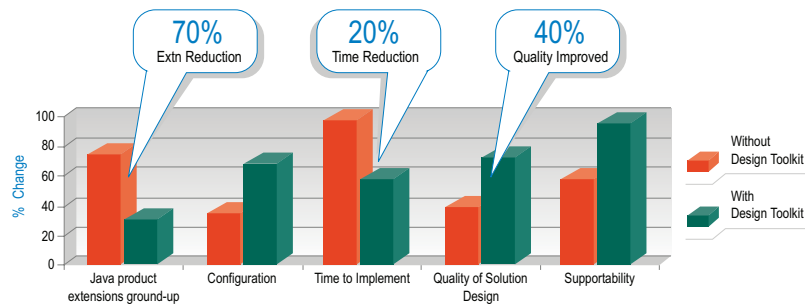

## Key benefits provided by RDT solution

- Faster go-live with high quality solution.
- Improvement in Productivity and / or reduction in cycle time (%).
- Enhanced quality of the solution, configuration and support capabilities for the package implemented.
- Easier Integration between multiple phases and provide enhancements to the solution without requiring to rewrite complex codes.
- Helps you follow a phased project approach without worrying about regression issues resulting from enhancements and subsequent deployments.

## Beneficiaries of RDT

A leading retailer in U.K leveraged Infosys' Rapid Design Tool Kit (RDT) for implementing a new Order Management Solution capable of Management and Fulfillment of Customer Orders across different Fulfillment Channels and realized tangible benefits.

*Is your Sterling Commerce (Order Capture/Order Management System/Warehouse Management) project using this revolutionary tool from Infosys? If not leverage Infosys' RDT solution to architect an agile and responsive Sterling Commerce solution.*

## Allied services

### Business Consulting

Provides you with strategic differentiation and operational superiority, assessments, proprietary industry analyses & projects structured around beating the competition.

### Independent Validation

Gives your applications the third degree treatment and tests their robustness and ability to survive your business growth. A "must have" service if you are serious about long term leverage of your application assets

### Enterprise Application Integration

Make the whole of your IT applications much greater than the sum of its parts. Infosys leverages Global Delivery Model (GDM) to deliver immediate and dramatic productivity growth like no one else can.

### Modular Global Sourcing

A strategically mature alternative to total outsourcing and ad-hoc offshoring. Align your sourcing strategy to your business strategy, modularize your applications and processes and leverage the power of the Global Delivery Model (GDM).
