Accelerating the Marketplace Economy

Digital transformation is at the core of the IT strategy in every organization. So, what differentiates those companies where digital transformation programs are a success?

Answer is companies who have the right platforms and ecosystems in place.

Organizations are moving from a product to platform-based strategy to augment

offerings and stimulate growth. As platform-based digital transformation evolves, enterprises adopt new digital business models by engaging with ecosystem partners to generate revenue. However, to identify new avenues of revenue, a connectivity platform for digital consumers and partners is the key.

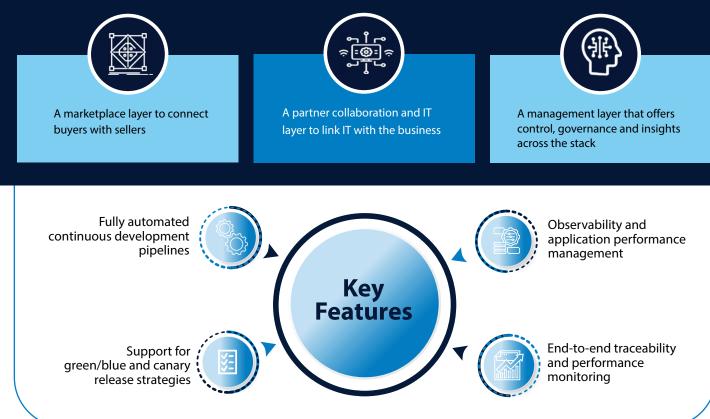

An enterprise marketplace can help organizations streamline the shift to platforms by connecting buyers and sellers, and creating value for all players.

Infosys Connected Marketplace

Infosys Connected Marketplace is a cloud hosted marketplace solution with next-generation analytical capabilities. It helps organizations rapidly create platforms for marketplaces such as B2B marketplaces and API business platforms. It also features capabilities that address challenges related to integration, platform, and connectivity.

Built on serverless technologies, Infosys Connected Marketplace has three layers:

How Infosys Connected Marketplace Helps

Buyers Partners Offload connectivity and integration tasks Bundle their services and products with those of to Infosys platform players Get visibility and insights on performance of their Access build-your-own-platform capabilities with flexible pricing options products and services Get predictable cost and timelines Improve their marketplace position and enable for integration cross-selling and up-selling **Benefits Highly resilient** Predictable Faster time to **Infosys** Connected and self-healing unit pricing realization infrastructure Marketplace is a serverless solution that helps organizations

Lower maintenance

Success Story

Interconnected Business for global online food ordering and delivery platform

The client wanted a flexible and reliable solution to integrate with their point-of-sale partners. They were looking for a partner who could deliver a vendor-hosted solution with scalable infrastructure and predictive pricing models to ensure faster time to market.

Infosys built a serverless marketplace with emphasis on observability to provide end to end traceability and performance monitoring. It also enabled collaboration between restaurants and third-party partners. Infosys technical and functional platform Lego accelerators to speed up the realization Increased operational efficiency via self-service merchant provisioning portal to on-board new restaurants.

Easy portability

across regions
