

# INFOSYS CONSUMER, RETAIL & LOGISTICS

We bring you powerful advantages to navigate your digital transformation

Infosys is an **AWS Premier Consulting Partner** that helps enterprises transform through strategic consulting, operational leadership, and co-creation of solutions in mobility, sustainability, big data, and cloud computing.

Through our collaboration with AWS, we ensure that you receive the right expertise and tools for migration, transformation, and management of workloads on the cloud; while **building successful AWS-based businesses**.

Leveraging **Infosys Cobalt**, a set of services, solutions and platforms for enterprises to accelerate their cloud journey, we bring together AWS capabilities needed to drive our customers' business and IT priorities through our comprehensive cloud offerings —right from setting up of the foundational layers to managing the complete infrastructure and application stack.

## Why Infosys Cobalt for Consumer, Retail and Logistics?

Infosys Cobalt helps businesses redesign the enterprise, from the core, and also build new cloud-first capabilities to create seamless experiences in public, private and hybrid cloud, across PaaS, SaaS, and IaaS landscapes.

Omnichannel sales, mobile commerce, technology-savvy customers coupled with usual business pressures to improve growth and margins keep enterprises in the consumer packaged goods, retail and logistics industry busy. The focus consequently shifts to personalization, on-demand and real-time supply chains, enhanced efficiencies, collaboration, and visibility of operations.

With Infosys Cobalt's community leverage, enterprises can rapidly launch solutions and create business models to meet changing market needs while complying with the most stringent global, regional and industry regulatory and security standards.
