

Oracle Fusion Applications Practice at Infosys

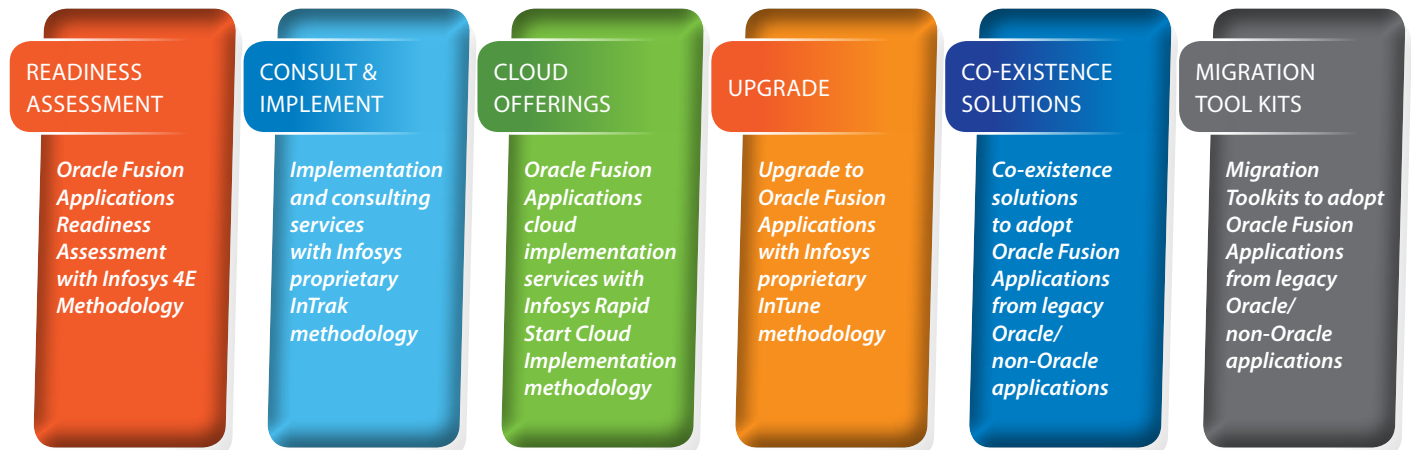

Today, enterprises operate in a dynamic business environment with an increasingly complex multi-geography, multi-application technology landscape. They require a comprehensive application suite to address the challenges posed by disparate enterprise applications - managing user experience, user productivity, proprietary technology and generating business insights.

Infosys' Oracle Fusion Applications practice is dedicated to help clients solve fundamental business and technology problems, achieve measurable business, and drive business transformation through the ease of use of next generation Oracle Fusion Applications. Based on open standard Oracle Fusion Middleware, these fully-integrated enterprise applications provide a rich user experience in both Oracle and mixed system environments to deliver accurate information and actionable insights to achieve operational excellence and global reach that define the enterprises of tomorrow.

Oracle Fusion Applications Center of Excellence (CoE) at Infosys
