

Accelerate Your Move to the Cloud

Integrate Cloud and On-Premises Applications

CLOUD AND
ON-PREMISES
INTEGRATIONS

Meeting the Challenge of the Hybrid Enterprise

Today it's easier than ever for lines of business (LOBs) to subscribe to software-as-a-service (SaaS) applications. But this can create a big headache for IT leaders tasked with integrating these new cloud apps with existing on-premises systems. With Oracle's cloud and on-premises integration solutions, you move from a complex integration architecture to a simple and agile platform that accelerates hybrid deployments, lowers costs, and increases business flexibility.

Use Powerful Integration Tools and Technologies

- **Oracle Integration Cloud Service** delivers a simple and intuitive solution to rapidly integrate your architecture.
- **Oracle Process Cloud Service** helps you rapidly design, automate and manage business processes in the cloud.
- **Oracle SOA Cloud Service** and **Oracle SOA Suite** provide a comprehensive and unified set of advanced components to seamlessly integrate on-premises and cloud applications and services.

Leverage Oracle PartnerNetwork and Cloud Marketplace

- **Oracle Partners** can help you choose the best strategy, products and implementation path for your business.
- **Cloud Marketplace** contains a growing library of pre-built adapters and integrations, published by Oracle and Oracle partners.

Reap the Benefits

- **Speed integrations.** Drive faster time to market and higher IT productivity.
- **Boost business agility.** Rapidly switch between cloud and on-premises deployments and maximize deployment options.
- **Reduce cost and complexity.** Eliminate patchwork of disparate integration tools.
- **Empower LOBs.** Seize opportunities with business-friendly self-service tools and process control.

ORACLE®

Infosys: Helping You Integrate and Extend Cloud Solutions

CLOUD AND
ON-PREMISES
INTEGRATIONS

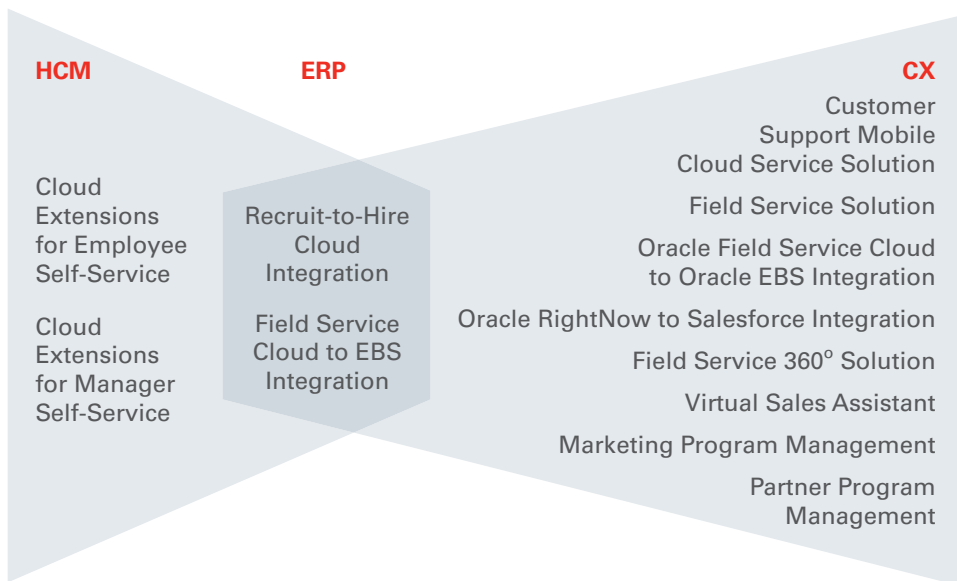

The Oracle practice at Infosys has developed an impressive portfolio of Oracle Cloud platform-as-a service (PaaS) expertise to help enterprises around the world leverage cloud technologies to drive user adoption and organizational success. No matter where you are in your journey to the cloud, Infosys Oracle consultants can help you with:

- **Cloud Maturity Assessments**—to identify the drivers in your cloud strategy and measure your current cloud capabilities to help facilitate user adoption.
- **Lift & Shift Strategies**—to examine your existing technology landscape, define your ideal end-state, map PaaS products and capabilities, develop a cloud migration plan, and also design, execute, and monitor governance protocols.
- **Building SaaS Extensions/Customizations**—to extend application features/functionality with Oracle Cloud.
- **Creating a Cloud Reference Architecture**—to facilitate the design and development of enterprise cloud initiatives.
- **Integration Services**—to integrate cloud, on-premises, and third-party applications.

PaaS Solutions—to extend HCM, CX, and ERP Applications

Infosys offers the following industry solutions with pre-built business processes:

Customer Success: Using Oracle Sales, Marketing, Social Cloud

With expert guidance from Infosys, this multinational telecommunications company transformed its critical partner relationship management capabilities by integrating its engagement solution with Oracle Sales, Marketing, and Social Cloud Services along with Oracle PaaS with Integration Cloud Service, SOA Cloud Service, and Java Cloud Service. The company expects to take its partner experience to the next level and dramatically reduce customizations and costs.
