

SAP SIMPLE FINANCE ON HANA WITH INFOSYS

Simplify your finance function with our
state-of-the-art finance and HANA capabilities

Faster, smarter, simpler — Get the most out of SAP Simple
Finance on HANA

Infosys®

Challenges faced by the finance function

New financial regulations across the globe are necessitating change. This, coupled with the need for lightning fast financial reporting has created an enormous opportunity for savvy enterprises. The traditional siloed finance accountant who is out of touch with the day-to-day operations of a large-scale organization, is a thing of the past. The future is the connected enterprise with enterprise-wide information available at the finance department's fingertips.

The world of data is changing swiftly and financial operations must deal with enormous amounts of data processed at higher speeds. There is then the granularity of the data, and not to mention the flexibility required in reporting. Against this backdrop, entire set of processes that deal with closing financial transactions have necessitated faster closing and reporting.

That's why it is of the utmost importance to let Infosys empower your business with the

best finance software in the marketplace: SAP's new Simple Finance suite on HANA.

Account-based COPA	New asset accounting	Fiori Transactional apps			
Central Finance	Real-time Intercompany reconciliation	Integrated business planning on HANA			
Finance integration architecture	Fast closing on HANA	Excel-based interactive reporting			

How can your organization benefit from Simple Finance on HANA?

In this competitive marketplace, speed matters. Simple Finance users will experience much greater execution speeds, in some cases, even a thousand times faster than normal. It removes bottlenecks from closing processes, eliminates time and effort needed for reconciliations, and provides real-time business performance information to stakeholders. The new

architecture also eliminates data redundancy, thus reducing the data size of your organization to a fraction of what is needed today. The new user interface tools such as Fiori, office analysis Excel will revolutionize user experience. All these translate into one main advantage: business value. When finance departments and CFOs receive reliable and consistent

instant insights anytime, anywhere, they're able to make more nimble decisions that affect the overall strategy of the enterprise.

Based on customer validations for Simple Finance, instant improvements were observed in operational performance as well as closing processes which were seen to be 5X faster than before. Below are some of the results:

How Infosys can unlock value for your business

With the Infosys offering, you can realize these benefits faster. Why? We have worked with Simple Finance on HANA, in partnership with our clients and SAP even before its release. This work has included extensive testing to make sure Simple Finance delivers what our customers need. We have ongoing Simple Finance implementations for customers and are

also collaborating across industries to develop business cases for Simple Finance implementation.

Together with our expertise in financial management, deep expertise in SAP, Simple Finance accelerators, and a team of highly skilled Simple Finance experts, we can implement this solution up to

30% faster. Therefore, we are uniquely positioned to lead your organization into the next era of finance transformation.

As the first step, Infosys can assess your finance landscape and provide recommendations on how you can iron out complexities and ease up your functional landscape, to put an end to your worries.

Send us an email on sap@infosys.com to speak to us to understand how Infosys can collaborate with your organization to lead your finance transformation
