

Infosys ESG Vision: Shape and share solutions that serve the development of businesses and communities

The Infosys ESG Vision 2030 encapsulates our ESG responsibilities and commitments towards the planet at large, the people and our stakeholders within the communities they inhabit. We embraced ambitious goals and meticulous plans for environmental preservation and serving the interests of our stakeholders.

ESG priorities to build a sustainable digital ecosystem

The universe of our material concerns is complex and multi-layered and it qualifies the value we seek to create through our business. Within the domains of E, S and G, we are constantly defining the most crucial issues and preparing to address them. In 2020, we reviewed the progress made over the past decade on our ESG goals. We sharpened the lens for a more practical and comprehensive view. This helped broaden our ESG focus and rank our priorities in order of their importance to our business and our stakeholders, as observed through a data-driven and consultative exercise.
