INFOSYS + HARNESS: STRATEGIC COLLABORATION OVERVIEW

harness

Infosys
Navigate your next

Infosys, a global leader in AI-first business consulting and technology services, and Harness, the AI Software Delivery Platform™ company, have formed a strategic collaboration to accelerate agentic AI-led software delivery transformation for enterprises globally.

This collaboration, led by Infosys Engineering, aligns the combined capabilities of Infosys Topaz Fabric and Infosys Cobalt with Harness, an AI platform for the Autonomous SDLC, to drive improvements in productivity, software engineering, AI governance, and time-to-market at scale.

This partnership strengthens our ability to deliver intelligent, secure, and scalable DevOps solutions. With 450+ certified engineers, 500+ Harness professional services engineers and support for 70K+ users, Infosys is set to drive enterprise agility, automate CI/CD, and enhance engineering efficiency—all powered by Harness' cutting-edge platform.

Partnership Benefits

1. **Certified capability at scale** — 450+ Harness-certified engineers close your platform skills gap from day one, with no hiring or ramp-up on your side.
2. **AI-led delivery, ahead of the market** — early access to Harness's agentic AI capabilities, plus a voice in the roadmap, so your delivery keeps improving rather than standing still.
3. **Proven, measurable outcomes** — practices that have cut cloud costs 25%+ and deployment time 60% in comparable engagements, not just frameworks on a slide.
4. **Lower total cost of ownership** — preferential Harness pricing on licenses and renewals that reduces your cost base, not just Infosys's.

Service Offerings

Implementation & Integration

Accelerate adoption with seamless Harness implementation, next-gen CI/CD pipelines, and enterprise-grade reliability.

Security & Governance

Enable secure, compliant, and observable DevOps through centralized governance, controls, and performance optimization.

Customizations & Extensions

Extend and tailor platform capabilities through custom integrations, plugins, and ecosystem collaboration.

Business Solutions & Innovation

Drive innovation and growth with POCs, go-to-market solutions, and accelerated migrations from legacy CI/CD tools

Value Propositions

- Unified AI-powered delivery across the full SDLC — up to 60% faster deployments
- AI-driven incident triage that cuts mean time to resolution
- 25%+ cloud cost reduction through AI-driven FinOps automation
- 25%+ less test effort with AI-generated, self-maintaining tests
- 20–30% gain in developer productivity from automation and reusable pipelines
- 40%+ greater system resilience through Chaos Engineering

Client Success Snapshots

Largest custodian bank in US

- Self-service onboarding, migration from Jenkins & Azure to Harness
- 3500+ developers
- 50+ apps/400 pipelines from Jenkins to Harness
- Standardized templates to support teams at different maturity levels

Security and Smart home solutions in US

- Jenkins to Harness Legacy CI/CD Redesign and Migration to Harness
- 5000+ user base
- 600+ pipelines redesigned and migrated from Jenkins to Harness
- Harness Dashboard customized for visualization of deployed services in GitHub

Global insurance and reinsurance company

- Zero touch pipeline templates for various tech stacks & deployment strategies
- Self-service app onboarding
- ~100+ applications onboarded successfully

Leader in video streaming and mass marketing domain

- 60% reduction in deployment time
- Scalable Kubernetes via Harness NG
- ~75% reduction in downtime for infrastructure changes

Solutions and Accelerators for Seamless and Faster Migration to the Harness Platform

- **Deliver integrated Infosys–Harness modernization offerings** to enable seamless migration from leading DevOps platforms (e.g., UCD, Jenkins, Spinnaker), leveraging AI-driven assessments, standardized migration frameworks, and automated validation.
- **Accelerate developer adoption and value realization** by embedding best practices and reusable assets, including CI/CD templates, OPA policies, and usage-based delegate optimization, to fully harness platform capabilities.
- **Enhance developer productivity and reliability** through advanced innovations such as self-healing pipelines and intelligent, data-driven automation built on the Harness platform.
