

CHANGE
IMAGINED.
CHANGE
DELIVERED

Infosys | Agile & DevOps Services

Murmuration is a phenomenon that results when hundreds, sometimes thousands, of starlings fly in swooping, pivoting coordinated moves through the sky. Always in agile unison. And with remarkable ability to maintain cohesion as a group in highly uncertain, changing environments. An inspiration, from nature, for the agile enterprise.

Delivering For Fast-Forward Business

To overcome the challenges of constant market change, businesses must be 'changeable' too. This means having the agility to spot and seize opportunities fast, introduce new products on demand, revamp business processes, and create new business models. The only way for companies to be able to do all this is by continuously improving their innovation cycles and

supporting them with people-amplifying technologies. Clearly, business and enterprise IT together must deal with a big part of the challenge of boosting enterprise agility.

DevOps and Agile, when integrated to work at enterprise scale can empower CIOs to drive continuous delivery in support of the

high-performing enterprise's need. Our Design Thinking-led approach to enterprise agility helps you drive Agile & DevOps adoption in an integrated way, taking an end-to-end view of the value chain, guided by Lean principles. We help you systemically make the changes through rapid iterations, enabled by intelligent automation.

Unlock Efficiencies And Innovation From Change. Faster

Prioritize

We help you spot the biggest opportunities ahead and to clearly articulate problems in your IT and process landscape that's preventing business from achieving its goals. We then help you solve them in a rapid, iterative, innovative and differentiated manner using Design Thinking and our maturity models. Design Thinking facilitates empathy-building and collaboration between business and IT organizations, development and operations, and between users and providers. The Agile and DevOps maturity models help analyze the current state, prioritize and create the roadmap for target state.

Adopt

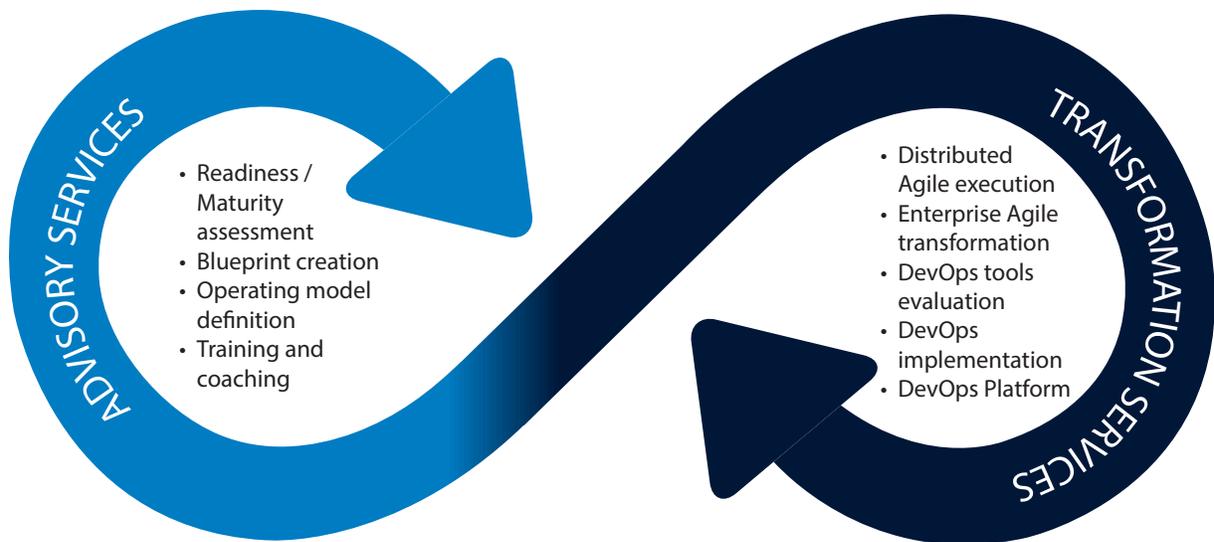

With Infosys you get the benefits of integrating Agile and DevOps to amplify value. This brings about alignment between business and IT, while also bringing a deep focus to alignment of development, quality assurance (QA) and operations. Ensuring both Agile and DevOps work seamlessly at enterprise-scale.

Accelerate

As part of our people+software delivery model, we bring with our services, the advantage of Infosys DevOps Platform complemented by AI-driven insights presented through a unified metrics dashboard catering to persona-based views. We also have our ready to use plug-ins, utilities, reference CI-CD pipeline, an agile ecosystem and a robust partner network that help accelerate realization of business outcomes, faster. This in turn amplifies the potential of your people to 'get in right the first time', learn and recover quickly from failure, create high-productivity workflows and drive rapid innovation.

From advisory to transformation and execution...

...Count on our integrated services to help you navigate the agile and devops lifecycle

Assessment

We assess your value chain across Build-Plan-Run and operations landscapes to determine the Agile and DevOps readiness and maturity. This includes an assessment of your application portfolio and tools repository. The evaluation sets the direction for the strategy formulation and execution to follow.

Strategy

We chart an enterprise-scale Agile and DevOps transformation strategy and blueprint for your business based on our assessment. Defining the operating model to execute the strategy is a critical outcome at this stage. This is built while finely balancing efficiency parameters with capacity for growth and innovation.

Coaching

Our certified Agile Coaches enable your teams through training on new ways of working, mentoring them to fully embrace these changes thereby enabling them realize productivity benefits. This often entails augmenting existing skills with adjacent or new ones – so specialist skills are available to everybody that needs them. We offer training support to facilitate democratizing of knowledge and to deliver the required change.

Tool Setup and Integration

We evaluate, set up and integrate the tools required to support your Agile and DevOps transformation journey. This stage involves the creation, validation and iteration of proofs of concept to arrive at the optimal tools portfolio and integration plan.

Implementation and Scaling

Implementation, in addition to delivering a coordinated set of DevOps processes, tools, systems, training, governance structures, performance metrics and organization structures, also facilitates continuous improvements and managing organizational change. We also help clients scale agile initiatives using industry models such as SAFe and leverage Infosys DevOps Platform for enabling larger adoption of Agile and DevOps across the organization.
