

BOOSTING AMERICAN INNOVATION

Investing in American technology skills and education

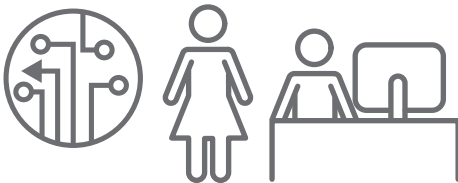

BUILDING TECHNOLOGY AND INNOVATION HUBS

Developing cutting edge technologies to support American businesses in an increasingly digital future

First Hub in Indianapolis, IN, opens in March 2018

A hub for client collaboration, and digital studios for prototype development

State-of-the art learning facilities with dedicated trainers and professors

Serving American clients in key industries, including: financial services, manufacturing, aerospace, healthcare, retail and energy

Technology and Innovation Hub Blueprint

OUR CONTINUOUS LEARNING ROADMAP

Developing cutting edge technologies to support American businesses in an increasingly digital future

Continuous Training

Infosys Lex

Infosys Lex is our advanced anytime, anywhere learning platform that is tailored to roles and individual interests.

It facilitates a culture of learning and collaboration for our employees and enables them to interact with the voice-enabled 'learning assistant' for learning guidance.

It aids talent in navigating their next by creating an environment for continuous learning to acquire the right and relevant skills.

New Graduates

6 Week Hands-on Training

- Dedicated Infosys trainers and external practitioners
- Weekly projects using real-life case materials
- Bespoke training to align to roles
