# MANAGED SECURITY SERVICES

With digital transformation, strategic priorities for the enterprises will continue to change and evolve making proactive management of cybersecurity a challenging task. Hence, they will look for partners who can not only secure them but also enable hands-off from non-strategic tasks.

Client Challenges

Gaining quick maturity of cybersecurity posture – Compliance, effectiveness, resilience and time-to-value

Operational efficiency - Cost, skills, scale, technology, processes, frameworks

Predictability of cost escalations and expected outcomes

Flexibility - On demand scale-up / scale-down, full security-as-a-service or Managed Security Services (MSS) model

Lack of visibility to know, measure and communicate risk and cybersecurity posture

Infosys Offerings

"We help our clients to continually improve cybersecurity maturity by leveraging our global network of Cyber Defense Centers powered by advanced security platform"

Identity as a Service

We provide identity governance, user access management and privileged account management services leveraging Infosys or client provided tools from the Infosys Cyber Defense Center (CDC)

Vendor Risk Management

We provide third party or vendor risk assessment and management services operations

Vulnerability Management

We provide application, infrastructure and or ERP VAPT services leveraging client tools or Infosys Threat Surface Management platform. Services are delivered from Infosys network of global CDCs.

Cyber Threat Intelligence

We provide ongoing threat, cyber intelligence and brand IP leakage monitoring services for clients from Infosys CDC

Infrastructure Security as a Sevice

We provide ongoing support of one or more infrastructure security controls such as firewalls, IPS, WAF, NAC, secure web gateways, host security etc.

Cloud Managed Security Services

We provide ongoing monitoring and support of one or more security controls for the cloud
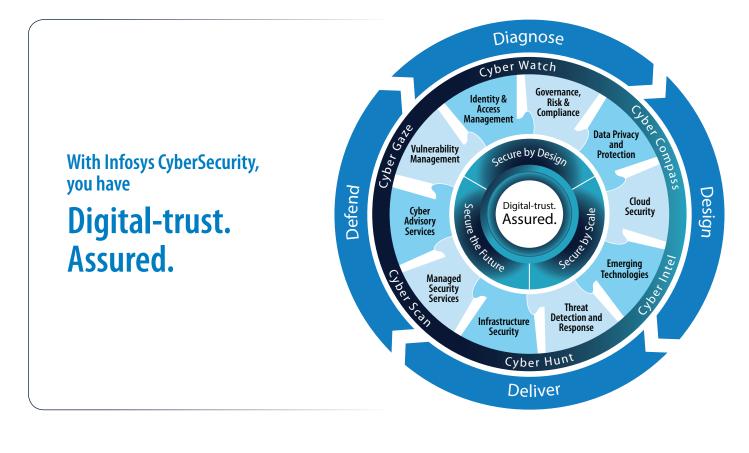

Threat Detection and Response Managed Services

We provide security monitoring and platform support of SOC tools (SIEM, TIP, UEBA, MA and Decoy Services)

Emerging Tech Managed Services

We provide SOC integration and monitoring of OT assets through SOC networks

Infosys Credentials

GLOBAL BEVERAGES COMPANY	*SOC monitoring, access provisioning, vulnerability management, DLP monitoring*	Operational efficiency for securing 40,000+ users and 500+ applications

Secure by Design — Deliver
Secure by Scale — Defend

PACKAGED FOODS COMPANY	*24x7 security monitoring, SOX compliance, PAM support & access management*	Extensive automation improved productivity

Secure by Scale — Design
Secure the Future — Defend
