

Infosys topaz CUSTOMER EXPERIENCE AI SUITE FOR ENGINEERING

Revolutionize Your Project Lifecycle Management with an AI-First Core

Overview:

Introducing our cutting-edge Gen AI based project lifecycle efficiency improvement platform for Salesforce developments spanning across – Discovery, Requirements Capture & Grooming, Development, Testing, Configuration Management leveraging Einstein and other LLMs through tailored Prompt Engineering. It enhances efficiency, accelerates cycle time and predictability for diverse project execution roles (Business Analyst, Architect, Developer, Test Lead, Config Manager, Prompt Engineer) throughout the development process.

Say goodbye to inefficiencies and welcome a new era of streamlined product development processes.

Key Features:

Streamlined
Project Setup

Effective User Story
Management

Design
Recommendation

Automated Code
Generation

Simplified
Deployment & Testing

Streamlined Project Setup: Get Up and Running Fast

- Quickly tailor your project by defining context and managing user personas.
- Leverage Large Language Models (LLMs) to enhance your development process. Utilize pre-trained LLMs or extend with Bring Your Own Model (BYOM).

Effective User Story Management:

- Generate user stories from diverse sources (meetings, notes, chats).
- Assess and synchronize requirements with your JIRA environment.

Design Recommendation:

- Auto-generate component specifications from user stories, reducing manual effort.

Automated Code Generation:

- Seamlessly create code artifacts like configuration workbooks, Apex classes, triggers, and LWC markup for faster development.

Simplified Deployment & Testing:

- Effortlessly create manifests and manage release notes for streamlined deployments.
- Generate test classes for code & test cases for stories, ensuring comprehensive testing.

Advanced Capabilities:

- Extract functional and technical details from existing Apex classes.
- Receive code optimization suggestions to maintain code quality.

Benefits:

40-50% Efficiency Boost

Automate tasks to save development time and resources. (Platform-proven)

Improved Quality

Ensure well-crafted user stories and optimized code.

Enhanced Collaboration

Facilitate seamless teamwork with integrated workflows.

Faster Time to Market

Deliver projects faster with streamlined processes.

Empowering Innovation

Free up valuable resources to focus on innovation and strategic initiatives.

This AI-powered Salesforce integration platform empowers you to streamline your development lifecycle, accelerate project delivery, and elevate your Salesforce development experience!

Infosys Topaz is an AI-first set of services, solutions and platforms using generative AI technologies. It amplifies the potential of humans, enterprises and communities to create value. With 12,000+ AI use cases, 150+ pre-trained AI models, 10+ AI platforms steered by AI-first specialists and data strategists, and a 'responsible by design' approach, Infosys Topaz helps enterprises accelerate growth, unlock efficiencies at scale and build connected ecosystems.
