

Infosys BI Vantage Solution

Enabling unified view of information across the enterprise

Challenges in the current enterprise reporting landscape

Accessibility

- Users need to view information from multiple tools side by side to co-relate information across functional areas where disparate BI tools are used for e.g. Webi, Lumira, other vendor tools
- Crucial information available in documents and custom visualization interfaces is not integrated
- Curating of information and external mash-up of information is needed from multiple tools
- Users need to switch across disparate windows to get to the required information

Ease of Use

- Need for learning / training in every tool being used within the system and be up to date with different BI tools
- Limited flexibility for standardized personalization based on user preferences across tools
- Seamless collaboration is not possible across BI tools
- Self-service capabilities are more aligned towards power users

Usage

- Lack of single view on usage of all BI tools across the organization to efficiently monitor and manage the diverse toolsets
- Unavailability of usage based recommendation
- Inconsistent user experience because of different UIs for different tools
- Multiple windows, navigational constraints while accessing reports/analyses across different tools

Standards

- UX across different tools from different vendors vary
- Lack of mechanisms to capture feedback and track ideas to share and standardize

Infosys BI Vantage Solution

Infosys BI Vantage solution is a boundary less platform which aims to enable a unified view of information available across the enterprise. This information is typically available as reports and dashboards built on disparate reporting tools and document management systems. Infosys BI Vantage goes beyond being a mere aggregation solution and serves as a one-stop solution for all information needs of users in an organization, with features such as enterprise report cataloguing, single-sign-on accessibility, search based on report metadata and usage across the enterprise and data governance.

Infosys BI Vantage Solution is a consumption workbench that breaks accessibility barriers, provides a complete consumption catalogue and amplifies usage

- Information scattered across BI tools?
- Users need to juggle across tools to make a decision?
- Lack of view on usage of tools?
- Inconsistent user experience?

- Metadata driven search
- Single sign-On
- Personalization
- Story boarding and mashed-up dashboards
- Simplified user experience
- Usage analytics

Features

Cataloguing

Enterprise wide report catalog enabled by metadata driven search

Collaboration

Dashboards with integrated insights from disparate BI reporting tools

Auto Discovery Adaptors

Crawlers for fetching report meta data from multiple BI tools making it technology agnostic

Recommendations

Report recommendations based on usage patterns enabling simplified BI insights

Lightweight Solution

Lightweight and a secure solution with provision for single sign-on and easy integration capabilities

Use Cases

Reporting Tool Consolidation & Rationalization

- Leverage usage analysis for eliminating less/unused reports
- Identify redundancies and consolidate

Centralized Repository

- Create a central repository of all corporate reports across all tools with technology/functional area wise breakdown

Insight Sharing

- Share observations with others by creating use stories
- Other users can further update the stories
