INFOSYS NEXT-GEN BUSINESS INTELLIGENCE

Business Intelligence Landscape

Enterprises today are locked in battle over their ability to discover and respond to strategic opportunities arising from the plethora of data they possess and, they have been looking at possible avenues of getting more value out of the available data. With the advent of the digital revolution and IoT, there is an explosion of data that needs to be curated, managed and monetized. The potential to create value is higher than what has been possible before. Smarter enterprises understand the need and have analytics drive their businesses. They spot and leverage new opportunities and respond to these possibilities rapidly to gain a competitive advantage.

Infosys Next-gen Business Intelligence offerings enable insights driven enterprises for superior business performance. Fueled by cutting-edge technologies for advanced analytics, Infosys Next-gen Business Intelligence offerings address cross-industry needs based on the following themes:

Customer Insights

Create insight driven experience at every stage
- Attract Customer
- Acquire Customer

Next-gen Business Intelligence – Strategic services

**Consulting:** services around the entire information value chain helps enterprises adopt, learn and make the right decisions using data along with providing strategy and implementation support as per the industry and client context.

**Strategic Business Analytics Center:** is a set-up within the enterprise-organization for the overall improvement of adoption and quality of BI and analytics usage across the board, overlooking data governance and change management.

**Organizational Change Management:** with Infosys IMPACT framework, is a proven model that helps optimize processes and applications, improves data consumption and helps enterprises build capabilities and partnerships maximizing returns on assets and technical infrastructure.

**Landscape Simplification and Modernization:** leverages the iModernize framework that helps enterprises realize value in the context of the highly volatile marketplace, including technology transformation, merger and acquisitions, new business model introduction and more, and helps businesses stay aligned to enterprise goals.

**Effective Data Governance:** is a ready-to-deploy solution that helps enterprises have a defined and effective plan around people, process, technology and execution.

---

A quick look into how Infosys Next-gen Business Intelligence has transformed some clients

- **Reduced offers execution time from 12-weeks to 1-week by processing 9.6 millions of transactions captured through 8 channels and accelerated customer 360 degree view creation in 6 months by sourcing data from 16 sources and processing 2M records in less than 1 hour to deliver powerful customer insights for a leading Bank.**

- **Built a big data platform, which collected, messaged, interpreted, integrated and stored structure and unstructured data from various sources and delivered strong insights into customer profiles, allowing the client to in turn sell new analytics based offerings to their clients. Thus, a new revenue channel was created, which reflects data monetization for a giant Singapore-based Telco.**

- **Just-in-time inventory allocation through analytics led to a reduction in lost sales and gross margin benefit of ~ USD 7.5M per year. A supply risk worth USD 8M per quarter was identified, and shortage on critical and high value medical supplies were proactively managed, thereby improving operational efficiency for a Pharma client.**
