

## The Infosys Commerce B2C Hybris platform

### Overview

Today's connected consumers create a challenge for B2C brands demanding consistent, contextualized experience that follows them at every point of their journey, be it web, mobile, call center, in-store, tablet, social, and so on. To remain competitive in today's consumer-driven business, organizations must adapt to changing customer behaviors, and deliver an agile, personalized experience across all channels and emerging touchpoints. Market leaders in the B2C segment need to respond faster and differentiate themselves

continuously and should provide a seamless shopping experience. Infosys commerce B2C Hybris platform is developed to cater to these rising expectations of the connected consumer for improved time-to-market and faster services.

Infosys commerce B2C Hybris platform provides a simple and ready-to-use platform for any B2C industry segment with powerful support to manage customers, products, pricing, search and navigation, content management, shopping cart, inventory

visibility, personalization, payments, promotions, vouchers, gift wrap, shipping, product comparison, product installation date option, customer service, and a lot more with the unified order fulfillment experience for both customer and organization.

Infosys commerce B2C Hybris platform is currently built to serve manufacturing, telecom, and retail segments and is adaptable to any B2C industry subsegment in a faster way with our expertise.
