

INFOSYS AND SALESFORCE® PRACTICE

Drive world-class innovation, efficiency and growth with Salesforce® cloud integration services from Infosys

Introduction

By 2018, 62 percent of customer relationship management (CRM) will be cloud-based and the cloud computing market will reach US \$127.5 billion as Salesforce® further solidifies its market leadership position**.

To sustain growth and increase profitability, your enterprise must enhance collaboration with employees, customers and businesses. When you engage, share and collaborate, your enterprise becomes increasingly agile and responsive to the needs of customers. To do this, you need collaboration platforms and applications that are easy to customize, integrate with processes and scale to meet emerging business requirements.

Infosys is a leader in cloud integration services. Our execution services include architecture definition, agile implementations, global rollouts, ecosystem integration, and platform-based application modernization and support services on Sales Cloud®, Service Cloud®, Marketing Cloud, App Cloud, Community Cloud®, Heroku, IoT, Analytics Cloud™, and many other AppExchange® technologies. Our capabilities stem from and include numerous Salesforce®-certified consultants, expertise in vertical markets and cloud technologies and intellectual property (IP). In addition, we have built strong partnerships with Salesforce® independent software vendors (ISVs) including Apttus, CloudSense, CloudCraze, FinancialForce, ServiceMax, and Vlocity to innovate faster and serve customers better. Finally, we have a diverse set of vertical-specific solutions for life sciences, insurance, consumer packaged goods (CPG)/retail, discrete manufacturing, and high-tech industries that enable us to steer customers towards high performance.

At a glance: The Infosys Salesforce® Practice

- **Experts and consultants:** Over 8,000 CRM consultants offering end-to-end services as well as a team of over 1200 Salesforce® cloud experts with over 800 certifications engaged in more than 200 engagements
- **Service offerings:** These include process and domain consulting, package consulting, implementation and development (greenfield transformation programs), application rationalization and modernization initiatives on SFDC (legacy to SFDC migration), managed services center of excellence (CoE), capex to opex return on investment (ROI) analysis, and Force.com® programs
- **Expertise:** This includes integration with different back-end systems and mobile platforms
- **Experience:** Our Salesforce® deployment experience is across different industry verticals – financial services and insurance, healthcare, retail and CPG, high-tech, discrete manufacturing, energy, utilities, and services

Infosys Salesforce® Center of Excellence

Our platinum consulting partnership with Salesforce® enables clients to benefit from next-generation solutions, a global pool of certified practitioners and robust development and support.

Industry focus

Infosys CarePlus™ : This is a next-gen integrated care management platform built as-a-service on Salesforce® (healthcare) and consists of:

- Collaborative platform for chronic disease management
- Intent-driven design for holistic user experience across multiple devices
- Digital layer of engagement through a well-evolved integration framework
- Predictive model and self-learning algorithms for hospitalization through ANN

Customer advocacy for retail

The Customer Advocacy Tool is a retail industry solution for digital and social media marketing that leverages the sales and marketing cloud of Salesforce® – Exact Target and Social Studio – for streamlined

consumer connect, behavioral targeting, campaign management, marketing effectiveness tracking, and social analytics. branded communication and inquiry process, behavioral targeting, campaign management, channel effectiveness, and social analytics.

iCRM

The Infosys Life Sciences CRM (iCRM) solution is a tailored solution based on the Force.com® platform that improves sales and marketing with a customized CRM solution for life sciences. This advanced solution drives sales force automation (SFA) and sales force effectiveness (SFE). It helps organizations reduce cost through better integration between sales and marketing and provides data analytics for better decision-making.

Solution Focus

Infosys Automation Framework™ is a standalone Java application that can automate build configuration, retrieve metadata and execute functional testing using scripting languages of choice. The framework saves nearly 40% of effort during build and testing phases. Our

Force.com® enablers help companies develop next-gen apps and facilitate legacy modernization through LotusNotes to Force.com migration tool® and Force.com data® loader framework along with deploying and managing the framework. The Social Enterprise Solution from Infosys uses Salesforce® and allied technology components to deliver streamlined and branded communication and inquiry processes, behavioural targeting, campaign management, channel effectiveness, and social analytics. Infosys Integrated Service Management Solution manages cases, activities, knowledge, and reporting with automation to assign and re-direct cases and activities for employees.

Knowledge repository

We codify best-practices, tools, process aids, and accelerators of successful projects in a centralized repository. This encourages knowledge sharing and enhances competencies, thereby boosting efficiency. We also have dedicated groups to research the latest offerings and releases from Salesforce®.
