

# ORCHESTRATING DIGITAL SUCCESS FOR OUR CLIENTS WITH PEGA

Infosys<sup>®</sup>

Over a period of eight years, the Infosys-Pegasystems alliance has taken giant strides. Today, Infosys is a Pega Platinum Partner, one of the first five partners to achieve this select status.

We have a strong growing practitioner community that boasts of over 500 Pega consultants and had a 500% increase in number of Lead System Architects, the *crème-de-la-crème* of Pega certified

practitioners. We have 50+ engagements across 30 clients spanning industries and geographies and a rich repository of over 20 Pega solutions, tools and accelerators. And it doesn't stop there: Infosys has executed one of the biggest Pega Cloud implementations spanning 70 geographies and 50 languages, in addition to other transformational Pega programs worldwide.

We work collaboratively with Pega to deliver solutions that maximize value for our customers on various stages of their digital journey. We have invested in a dedicated Pega Center of Excellence (CoE) which focuses primarily on innovation, technology evaluations, prototyping, and industry solution development.

## Retain your Telecom customers with Infosys e-Top solution

The Telecom industry is going through a digital disruption. Increasingly, the marketplace is evolving to a stage where each customer is a segment of one, demanding products and services from his Communications Service Provider (CSP) to be delivered NOW and ready to take business elsewhere if unsatisfied with the quality of service.

Making the right offer at the right time is thus imperative to convert and retain customers and so is fulfilling such offers in time. Any dispute also needs to be handled quickly and decisively to avoid losing the customer and discouraging prospects.

## Solution overview

**Infosys Enterprise Telecom Order Platform (e-Top)** enables CSPs to rapidly build agile, quick-to-deploy solutions to enable sales agents to keep customers satisfied through the cycle of offering, fulfilment and dispute resolution. e-Top thus helps increase operational efficiency and improve satisfaction through every stage of the customer journey.

Dashboard and reporting

Separate user portals

Admin functionality

Alerts

**Strong integration with related workflows from the same platform**

Back office workflow and visibility.

Integration with other legacy / external systems

Survey management

Root cause analysis / text mining / analytics

## Build your insurance customer's loyalty with Infosys McCamish CSWD

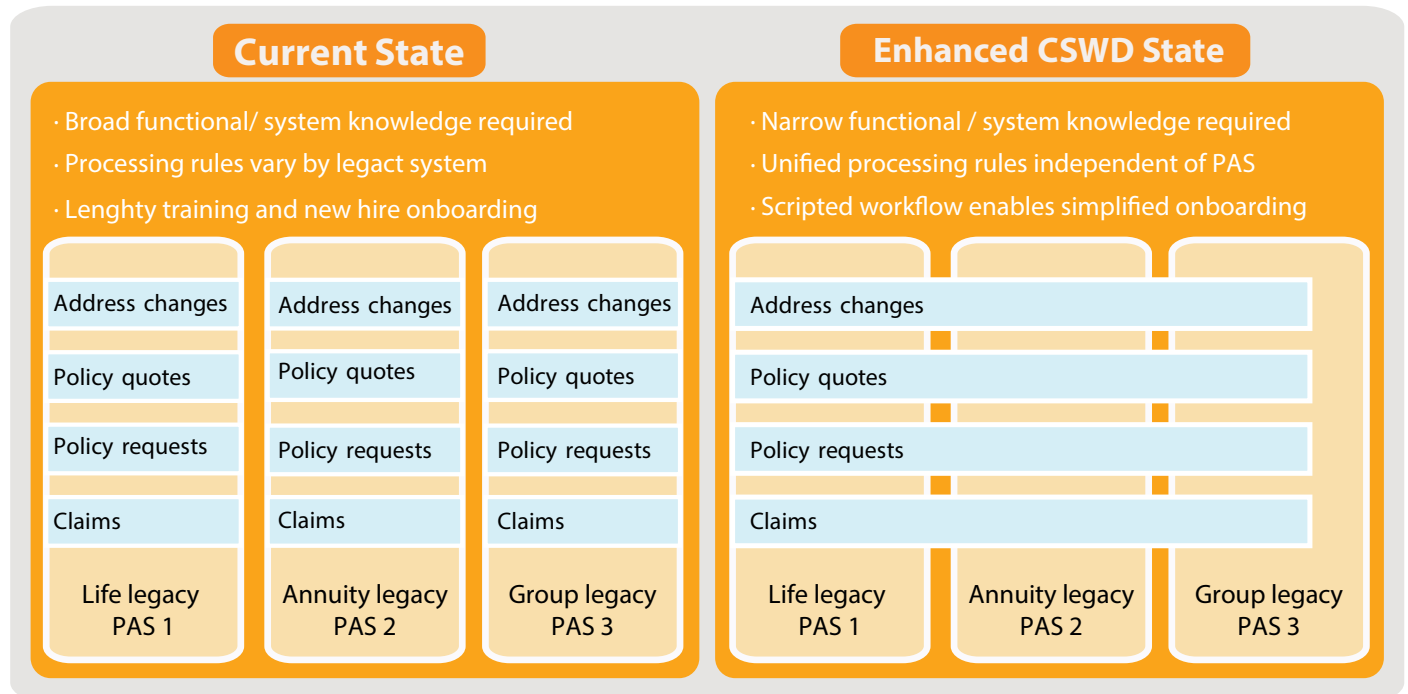

The rapid changes in technology over the past five to ten years have transformed the way companies need to do business to adapt to a changing, and ever more demanding consumer base. Feature rich products are launched in a competitive market space, with increasingly shorter

product life cycles. With ever growing expectations from our clients, brought about by standards set by companies outside of our industry, brand loyalty has given way to Customer Experience.

**Infosys McCamish suite of Customer Service Work Desk (CSWD) products,**

call center, back office, and claims, was developed to change the way we do business as a TPA, and the way you can do business as a carrier. CSWD is more than a front end to a modernized platform, it is a true game changer in the way the insurance business is handled.

## Configurable business models: Product / PAS vs functional

CSWD is a BPM, workflow, and policy servicing application rolled into one, seamlessly integrating any SOA enabled platform components, including CRM, document management, scan and intake, and legacy policy administration systems.

## Business benefits

Modernization of your platform can begin simultaneously with your latest client centric operational objectives. CSWD enables our platform solution to include integrating your legacy systems and a modernized PAS under a single interface, giving your operations a 360 degree view and a consistent customer experience, all while allowing you to bring new products to market quickly on any new platform.

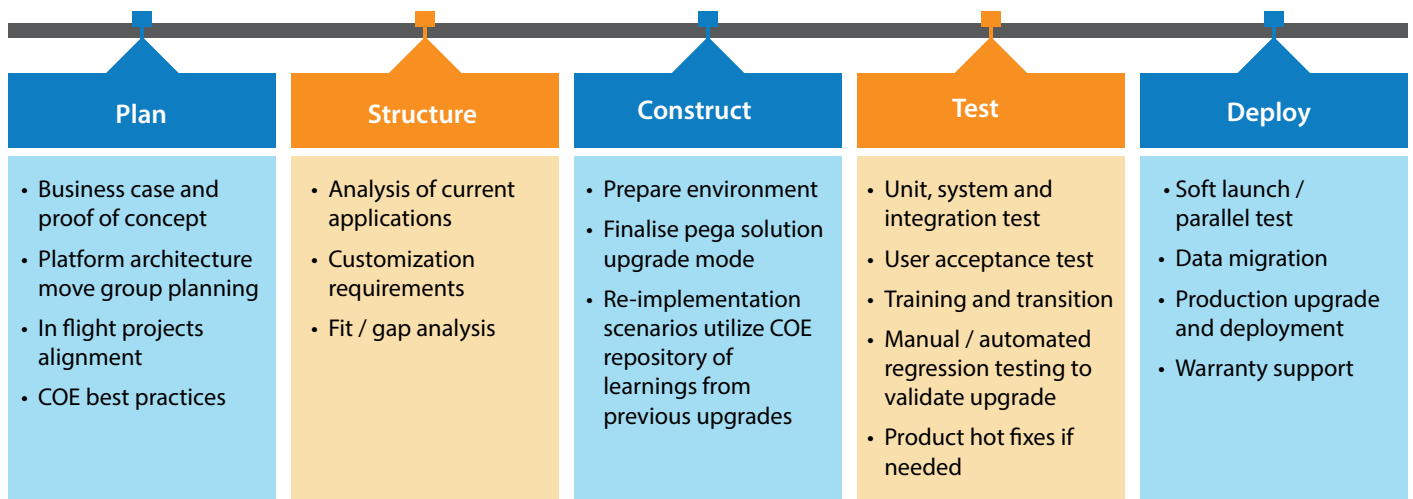

## Enhance the strategic value of your Pega investments with Infosys Pega Refresh Kit

Upgrades are an essential step in realizing the benefits of any critical platform investment and to ensure enterprise reference architecture compliance and continuing product support. In a digital economy, there is a need to evolve quickly in terms of both business processes and technology. Pega upgrades should thus be viewed by an enterprise as an opportunity to enhance the digital experience for customers, employees and partners.

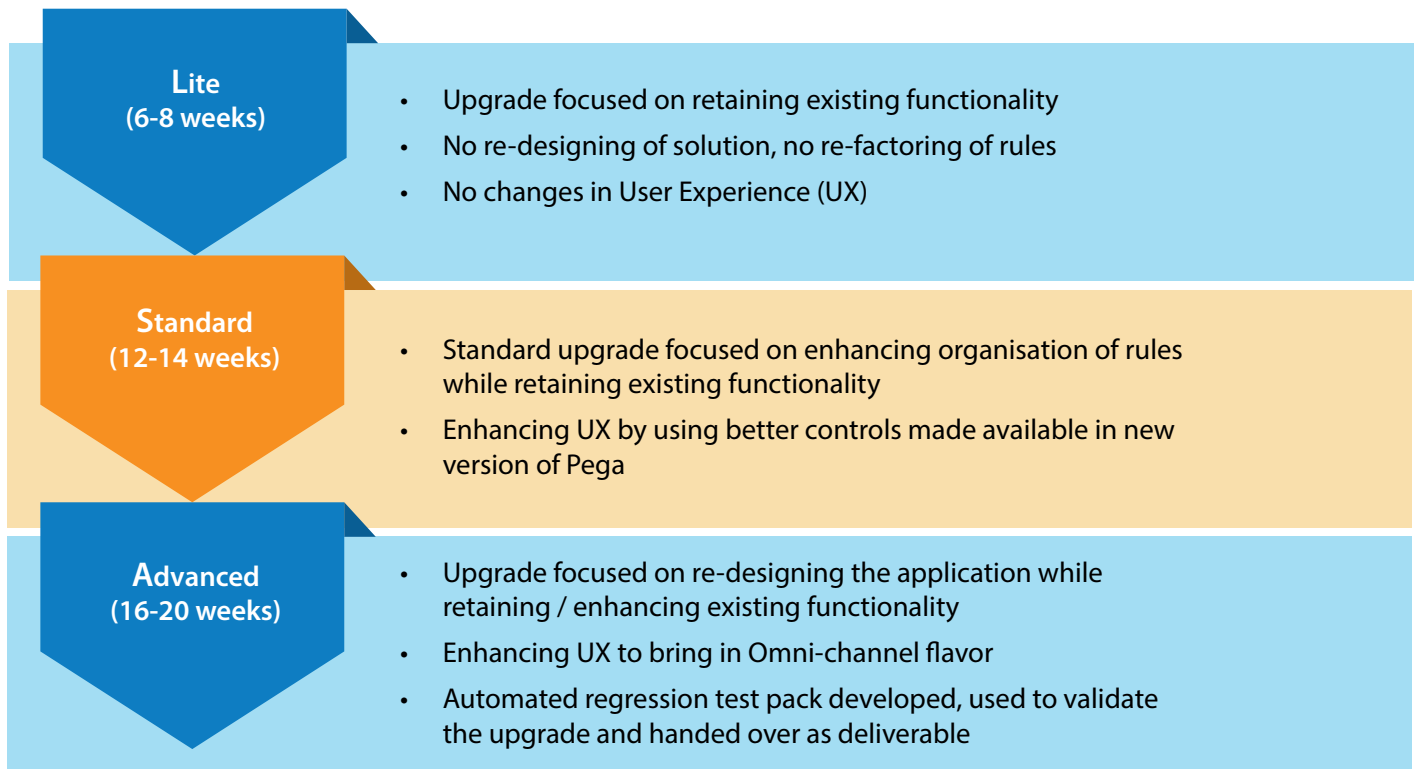

Infosys, as a trusted Pega Platinum Partner, has developed a Pega refresh kit based on strong expertise in Pega programs worldwide. The kit, developed by our Pega centre of excellence, helps visualize how the digitized version of your existing process significantly improves customer experience, by leveraging advanced features available on the platform. Pega refresh kit adoption ensures several client benefits including next-generation platform features (such as mobility and responsive UI), architectural compliance, scalability, and maximizing the product ROI.

## Solution overview

Infosys Pega Refresh Kit is tailored to address the end-to-end requirements of any upgrade program, starting from business case preparation to deployment. The focus is on robust execution with minimal business disruption and zero downtime. The kit performs both quantitative and qualitative analysis of existing Pega applications to provide insights that lead to a smooth and seamless upgrade.

Our upgrade packages offer clients predictability in terms of both duration and cost.

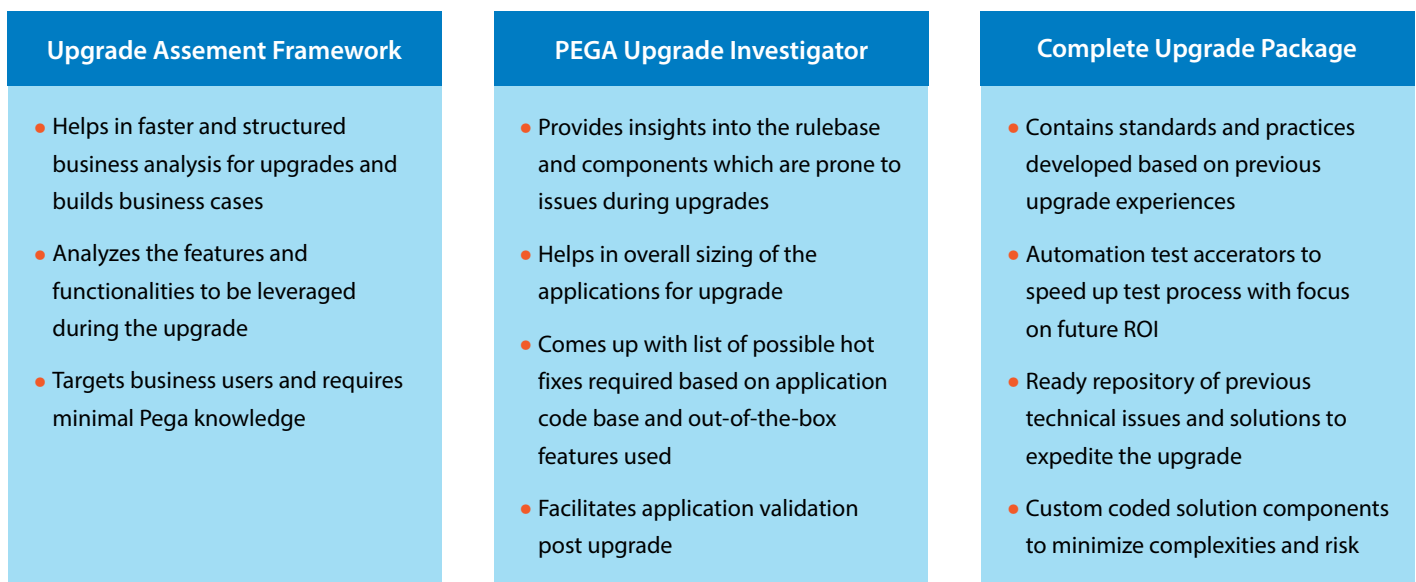

## Tools and accelerators

Infosys tools and accelerators help cover a wide variety of needs ranging from vital upgrades to desirable upgrades. These tools include

assessment frameworks, upgrade investigator for deep dive into the rule base, best-in-class repository of learnings and best practices from

previous upgrade experiences. Infosys also provides support for Pega upgrade certification and automation testing of the platform.

## Benefits delivered

- Predictable Pega upgrade with minimal business disruption
- Reduced total cost of ownership by the virtue of Omni-channel UX – build once for all channels
- Faster time-to-market due to support of rich solution and accelerators repository
- Accessibility to PEGA COE to address any support need
- Complete package from Upgrade to automation to maximize ROI
