

ACCELERATE YOUR  
DIGITAL ENGINEERING  
JOURNEY WITH  
INFOSYS ARAS  
INNOVATOR SERVICES

End-to-end Infosys ARAS Innovator services—from deep customization and seamless deployment to lifecycle upgrades, flexible integration, and round-the-clock managed support—enable enterprises to modernize and scale their product engineering landscape with greater agility and confidence. Leveraging the open, low-code, and upgrade-safe architecture of ARAS Innovator, Infosys helps organizations streamline product development, enhance collaboration across the digital thread, and reduce total cost of ownership.

Trusted by leading enterprises worldwide, Infosys combines deep ARAS PLM expertise with proven accelerators and best practices to deliver resilient, future-ready PLM solutions.

ARAS Innovator is widely recognized for its flexibility & scalability and is changing the paradigm for delivering PLM and AI-ready digital thread solutions for the modern product-driven enterprise.

## Infosys PLM Services Offerings

Product complexity, software-driven design, and global collaboration are reshaping how organizations engineer and deliver products. To remain competitive, enterprises need flexible, scalable, and upgrade-safe PLM platforms.

ARAS Innovator, with its open, low-code, and service-oriented architecture, is emerging as a strong alternative to traditional heavy PLM platforms—especially for companies seeking rapid configurability, lower lifecycle costs, and faster digital thread enablement.

### ARAS 2026 Certified Partner – Authorized VAR & System Integrator

Infosys is a recognized ARAS 2026 partner, designated as an Authorized VAR and System Integrator, enabling enterprises to maximize value through certified implementation, integration, and lifecycle services.

### Key Statistics

#### Infosys Digital PLM Practice

**1400+**  
PLM Experts

**20+ Years**  
of Providing full stack  
of PLM services

**6+COEs**  
PLM Academy with  
state-of-the-art  
training capabilities

**16000+**  
Approved  
documents in the  
Process repository

**100+**  
PLM  
Implementations

**NA/EU/APAC**  
Spread across  
regions

#### Infosys ARAS Innovator Services

**10+ years**  
Experience in providing  
Aras Innovator Services

**7000+**  
Supporting End  
User base

**12+**  
Readymade  
Engineering  
solutions

**15+**  
Engagements and  
implementations

**NA/EU/APAC**  
Clients and Experts  
spread globally

## Infosys ARAS Practices - Overview

Infosys delivers comprehensive ARAS Innovator-based PLM services that enable enterprises to modernize, digitize, and scale their engineering value chain on a resilient and highly configurable platform. Our ARAS practice helps organizations adopt a future-ready, connected product development ecosystem by leveraging the flexibility, low-code extensibility, and upgrade-safe architecture of ARAS Innovator.

With deep PLM and ARAS domain expertise, Infosys partners with clients across the full lifecycle—from PLM strategy and roadmap creation to ARAS implementation, integration, automation, upgrades, and continuous value realization.

### Key ARAS-Specific Capabilities

ARAS Consulting & Maturity Assessment	ARAS Upgrade & Migration Services	Engineering Data Management & Collaboration
End-to-end implementation of core ARAS applications	ARAS Integration Services	ARAS Cloud, DevSecOps, and Automation

## Our Core ARAS PLM Service Offerings

<b>Customization &amp; Configuration</b> <ul style="list-style-type: none"> <li>Scalable, domain-driven PLM customization</li> <li>Low-code configuration, UI customization, and workflow automation</li> </ul>	<b>PLM Solution Accelerators</b> <ul style="list-style-type: none"> <li>Agentic AI Automation</li> <li>PLM light viewer</li> <li>Oracle ERP connector</li> <li>CI/CD pipeline automation leveraging TAF, Robot Framework, and Playwright</li> </ul>
<b>PLM Operational Services</b> <ul style="list-style-type: none"> <li>SLA-driven end-to-end PLM app and infrastructure operations and support</li> <li>On-premises, cloud, and SaaS-based operations and support</li> </ul>	<b>Deployment &amp; Upgradation</b> <ul style="list-style-type: none"> <li>Seamless deployment and upgrade management</li> <li>Version migration with minimal disruption</li> </ul>
<b>PLM Consulting Services</b> <ul style="list-style-type: none"> <li>End-to-end PLM consulting and transformation planning</li> <li>Digital thread maturity assessment</li> </ul>	<b>Training and Change Management</b> <ul style="list-style-type: none"> <li>Role based training and enablement programs</li> <li>OCM to ensure strong user adoption</li> </ul>

## Key Infosys ARAS accelerators

Accelerator	Explanation	Business Value
 <p>Agentic AI</p>	AI-powered natural-language interface for interacting with Aras Innovator data and executing intent/goal-based actions.	Automated user provisioning across 10+ Aras apps for ~6,000 users, saving ~3.5 FTEs and improving speed, accuracy, and governance.
 <p>PLM Light Viewer</p>	A custom app that uses existing Aras REST services to provide licensed free access to PLM data, with built in user registration and onboarding.	Cut PLM costs by 30% while expanding secure, self service access to consume enterprise PLM data without added IT overhead.
 <p>OIC connector Item BOM &amp; Routing to ERP</p>	A flexible, custom Aras–Oracle ERP integration enabling multilevel product variant management and seamless BOM/routing publication.	Eliminates Oracle connector licensing costs while delivering greater customization control, advanced variant handling, and ~10% overall cost savings through a custom Aras–Oracle EBS integration.
 <p>Document Generation With ASPOSE</p>	Empowers business users with low code, self service document templating and automated one click generation of specification sheets for distribution.	Transforms document publishing by enabling business managed workflows, one click automation, and a reduction in turnaround time from 81 days to just 20 minutes.
 <p>Test Automation Framework</p>	An open source–based automated testing framework with startup scripts kit enabling web and CAD integration testing with seamless CI/CD support in a DevSecOps pipeline.	Cuts manual regression effort, improves release stability, and accelerates CI/CD and testing cycles by ~70% using Playwright automation.
 <p>Quality Management DFMEA/ PFMEA/MPP</p>	Enhances FMEA efficiency with DFMEA data protection, automated Action Priority calculation, intelligent PFMEA auto population, and seamless linkage to MPP driven process planning.	Improves data security, reduces manual errors through intelligent auto population, and enhances traceability and process control via tighter PFMEA–MPP integration.

## Case Studies

### Aircraft Manufacturer

#### Multiple Aras Version Upgrades & Validations

Empowering ground support equipment teams with a unified Aras based technical document solution that streamlines CAD integration, lifecycle control, and cross system collaboration. Simplified product structure integration for improved user productivity.

### Energy Equipment & Manufacturing Company

#### (AD+ AMS Program)

Driving large scale operational excellence through an optimized Aras based AMS ecosystem powered by Agile development across large hybrid environments. This reduced AMS tickets, improved resolution efficiency, and delivered consistent high quality outcomes at scale.

### US-Based HVAC Manufacturer

#### Software Delivery to Shop Floor Program

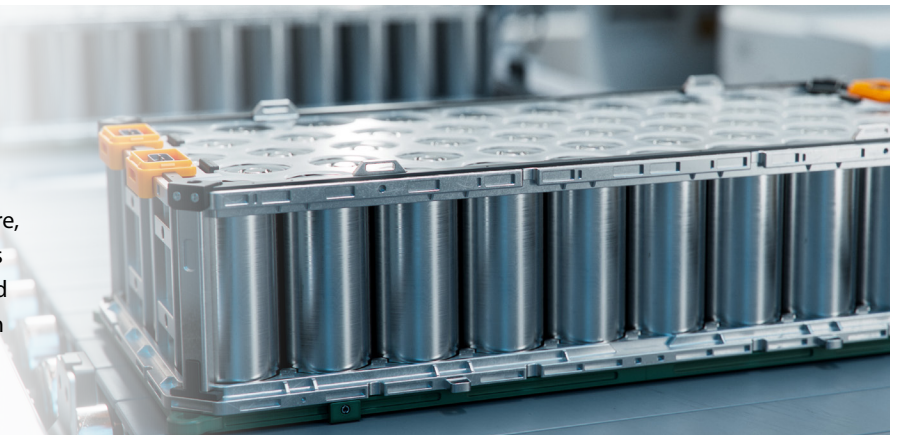

Delivering end to end digital thread transformation by unifying PLM, manufacturing, and enterprise systems to drive speed, accuracy, and scalable innovation across complex engineering enterprises. This enabled faster, traceable software delivery, unified system integration, and stronger data validation across ECR/ECN/MCO processes.

### EV Battery Manufacturer

#### Greenfield Aras SaaS Implementation

Accelerating a Japanese EV battery manufacturer's digital transformation by delivering a scalable, secure, and fully automated Aras SaaS implementation. This helped the client reduce TCO, improve resilience and security, and ensure seamless integrations with high availability for global teams.
