

DELIVERING HARMONY IN HEALTHCARE

ADVANCING HEALTHCARE THROUGH AI-FIRST INNOVATION

Healthcare transformation takes more than technology. It takes AI innovation, deep healthcare expertise, and the ability to turn strategy into action. **Infosys and Optimum Healthcare IT** bring these strengths together to help healthcare organizations connect intelligence with implementation—from modernizing core systems to improving operations, experiences, and outcomes.

THE CHALLENGE When Healthcare Systems Don't Work as One

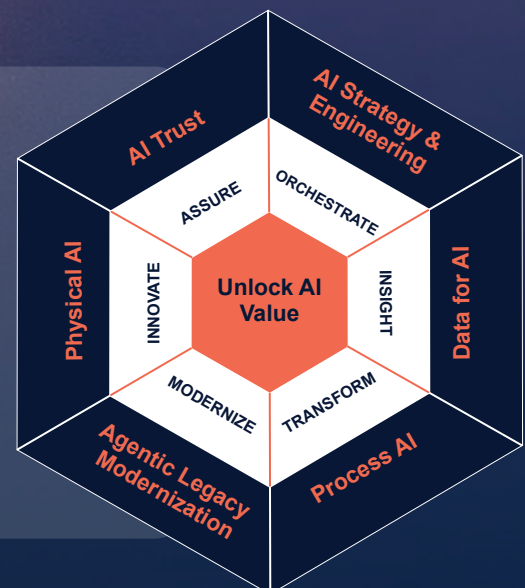

Across healthcare, critical functions often operate in silos. Fragmented systems, disconnected workflows, and legacy technology make it harder to connect data, coordinate decisions, and respond at the speed modern healthcare demands.

The result — Higher costs, slower decisions, compliance risks, and inconsistent experiences across the care journey.

THE SOLUTION The Foundation for AI-First Healthcare

AI delivers value when strategy, data, processes, governance, and engineering work together.

The **Infosys AI-First Value Framework** brings these capabilities together in one integrated foundation, helping healthcare organizations accelerate transformation, strengthen compliance, improve operational performance, and scale AI with confidence.
