

INFOSYS CaPSule - SOLUTION SUITE ON S/4HANA FOR LIFE SCIENCES

Infosys
be more

Business Needs

How can a global template with process harmonization, standardization and simplification be built?

How can a solution with SAP and industry best practices be built?

What innovation does S/4HANA bring and how will it benefit our business?

What knowledge is needed to design and implement critical interfaces to integrate with third party / SAP satellite applications?

How can a PoC to evaluate S/4HANA be built and what should be the scope and expertise required?

How can rapid deployment with optimum cost be achieved?

What tools / accelerators can we use during implementation to help reduce efforts?

What is the best solution for supply hub with automation?

Infosys Solution

71 Best practice scenarios across, all tested and enabled in a functional SAP S/4HANA environment
