

## Euroshareholders Corporate Governance Guidelines 2000

“Euroshareholders” is the confederation of European shareholders associations, constituted with the overall task of representing the interests of individual shareholders in the European Union. In April 1999, the Organization for Economic Co-operation and Development (OECD) published its general principles on corporate governance. The Euroshareholders guidelines are based on the same principles, but are more specific and detailed. Subject to the statutory regulations in force in India, we comply with these recommendations.
