July 19, 2010

Welcome Address

CORPORATE PARTICIPANTS

Mr. Prashant

Infosys Technologies –DC Head – Jaipur

Shekar Narayanan

Infosys Technologies – Investor Relations

Prashant

Good morning everyone. I would like to extend a warm welcome to all of you to Infosys Jaipur. It's my pleasure to welcome all of you here. My name is Prashant and I am the local center head here and on behalf of Infosys and the entire Jaipur center, it's a big pleasure for us to host this meet here.

I will just start by giving you a very brief about what is the work we do here in Jaipur. At present, we have mostly BPO work here. We have about 1100 Infosysians working here and all of this growth significant work has happened in the last 15 months where we have nearly doubled our size and we are looking to continue to grow the BPO presence here in Jaipur. We do work for banks here, for media clients and HR services firms. Most of the work is either in the banking space or in the F&A space. We are also focusing some of our platform clients here - HR platform, we have a platform for the media industry called "Newspaper in a Box", those two platforms we are focusing here in Jaipur.

This building that you have here is one of the campuses. We have another campus in Sitapura Industrial Area which is an STPI unit. This is a newer campus here. You have seen one building here. There is land enough outside for many more such buildings and over the next few years we are hoping to grow this center. This particular building has just recently been certified by LEED Act Platinum Standards, so it is one of the most environment friendly buildings around the world. That is a matter of great pride for us.

Throughout this day there will be a lot of interactive sessions for you. I think you already have the schedule here. There is a team of volunteers, should you need any help they will be glad to help.

Without taking much time, I would like to invite Shekar to take you through the rest of the day. Thanks.

Shekar Narayanan

Good morning everyone. I am Shekar from the IR team. Just wanted to keep you posted that this room and also the break-out sessions wherever it is happening, is Wi-Fi enabled. As part of the green initiative last we had decided to do away with physical printouts for the presentation and instead of that, we had given pen drives to all the participants last year. This year we went a step further and decided to provide a link for all of you to download the presentations. The link is available on the plasma screens right in front of you. I would request you to copy the link to a browser and then download the presentation.

With that I will handover to Kris to take this forward. Thank you.
