It is often said that if you are overwhelmed by the size of a problem, break it down into smaller pieces. Especially those that we think of as daunting, overwhelming, and incredibly hard – they can all be accomplished by taking on small parts at a time. Or can they?

In business, these parts are mostly linked together and conventional wisdom leads one to think that improving the parts, one at a time, will improve the whole. The truth, however, is that a business is rarely, if ever, transformed in this way because this approach misses the vital intersections between the parts, where value can leak and be lost. As navigators of our clients’ transformation, we understand the power of a unified, all-encompassing and concerted effort. It’s all about the enterprise acting as one in service of a common goal. So, when it came to our own transformation, we knew we had to start at the foundation that holds together all our business units and functions, target the top and bottom layers of our workforce along with everyone in between, and let our shared purpose lead the way. We call this approach to our reinvention – One Infosys.

Like our clients, across industries, we too are racing to increase the digitalization of our ways of working. In addition to strengthening our capabilities in automation, data analytics, AI, digital experience and cybersecurity, we are amplifying the outcomes of these improvements with the cloud. Infosys Cobalt™ – our powerful set of services, solutions, and platforms for enterprises – is already accelerating cloud-powered transformation for our clients. Boosting of our own digital muscle with the cloud is additionally helping us embrace agile ways of working, drive faster application development, and assure better digital security across projects. As a result, we are able to bring new capabilities, with greater relevance to our clients’ agendas in days rather than months, while sharing the benefits of better cost-managed solutions and faster modernization.

Beyond the technology, we know it is our people who translate and integrate new digital methods and processes into existing ways of working, orchestrating success for our clients. Our transformation required that every employee had the digital skills to execute the envisioned change and every leader knew how to help their teams think and act in sync in their day-to-day work. We redoubled our reskilling and upskilling efforts company-wide so that every employee was enabled and incentivized to deliver better outcomes and every manager could make a compelling case for change while acting as a role model to inspire others to move forward.

Without losing focus on bottom-line results, our One Infosys approach to transformation also seeks to address issues of broader relevance such as climate change and the employment implications of advances in automation and artificial intelligence. We know that the potential of our digital prowess to make a difference and our role as a responsible corporation stretches far beyond the well-being of our employees and customers. Many businesses look to us for guidance, and the industry looks to us for inspiration. Every Infoscion, we know, is driven by the idea of leaving the world a better place than it was when they started to be part of the Infosys ecosystem.

We hope to share glimpses, in this Integrated Annual Report, of how the One Infosys approach is accelerating all-round progress for all our stakeholders.
