If the above mentioned challenges sound familiar, then the Infosys Payments Testing Solution can help improve the efficiency of your QA organization.

**Infosys Payments Testing Solution**

Infosys' Payments Testing Solution, a combination of several point solutions and repository of reusable test artifacts helps clients automate and accelerate their payments’ testing programs. This allows client organizations to improve the quality of their applications and reduce their cost of testing by up to 25%.

---

**Case Studies**

1. A leading global bank headquartered in UK undertook a legacy modernization program. The generation of test data and SWIFT messages were consuming considerable time and resources. By leveraging the Infosys Payments Testing Solution the bank was able to improve time-to-market and reduce cost of testing by 40%.

2. A global investment bank hindered by performance and scalability revamped its legacy cash management and payments platforms. By adopting Infosys Payments Testing Solution to automate the testing of business rules and schemas, the client was able to reduce cost of testing by 30% compared to previous cycles. More importantly, the client was able to deploy a defect-free product in the production environment.
Payments Testing Solution Components

Feature

- Automates generation of SWIFT MT payment messages and SEPA XML Messages
  - Parses and extracts data from intra-day files, enabling automated reconciliation with payment messages
- Validates the format of different payment files. The tool can also be configured to support new formats of payment files
- Validates the IBAN/BIC and country code combinations required for testing applications in SEPA
- Replicates SWIFT messages, in precise sequence and format, to expedite test data generation process during performance testing
- Automates functional testing for SWIFT messages validating business rules as well as schemas during Payment Modernization Programs
- Over 5000 payment specific test cases, including scenarios for ISO 20022, SEPA and US/UK payments. Further, customized test business processes are available for third party products
- Automates validation of payment schemas, virtualization of payment services and aids in performance testing of applications

Benefit

- Reduce test data preparation effort by 20%
- 25% effort saving in reconciliation of large volume transactions
- 15% improvement in time required for test execution
- 5% reduction in testing effort
- 25% reduction in effort spent on generating test data for performance testing
- 3x improvement in test execution time
- Reduce test case creation effort by over 40%
- Reduce overall testing effort by up to 20%

Infosys Independent Validation and Testing Practice

Infosys’ Testing Solutions practice provides 3rd-party validation solutions that help global 2000 companies win in a flat world. The 9000 people strong practice offers testing services which range from custom validation, to specialized testing, to process consulting, across business verticals. The unit’s IP based solutions program ensures significant improvement of testing efficiencies and testing cycles. (www.infosys.com/testing-services)
