

Infosys Announces Strategic Alliance with CyberSource

Companies Team to Provide Fully Integrated eCommerce Implementations for Global Customers

Fremont, CA - June 8, 1999 - Infosys Technologies Ltd. (Nasdaq: INFY), a leading software consulting firm, today announced a strategic alliance with CyberSource Corporation, a leading provider of real-time eCommerce transaction processing services for payment, tax calculation, risk management (including fraud screening), fulfillment management and distribution control. The new alliance will speed the adoption and deployment of reliable, secure and complete eCommerce solutions that rapidly deliver business value and competitive advantage to customers worldwide.

"CyberSource services are designed to make the eCommerce transactions secure, cost-effective and robust," said Steve Klebe, Vice President, Strategic Alliances of CyberSource. "Our alignment with Infosys benefits customers by enabling reliable deployment of eCommerce solutions on time and on budget. Our customers will benefit from Infosys' expertise in providing complete eCommerce solutions integrated with back-end systems that shorten time-to-market cycles," he remarked.

Under the alliance agreement, Infosys will deliver scalable, reliable and comprehensive solutions using CyberSource services and technologies, emphasizing speed-to-market and tight integration to back-end systems. Under the alliance, Infosys will offer systems fully integrated with CyberSource products and services for Internet merchants.

"This alliance complements both organizations, utilizing CyberSource technologies and Infosys' global delivery approach to eCommerce implementation," stated Phaneesh Murthy, Senior Vice President, Worldwide Sales for Infosys. "By deploying this unique combination of eCommerce expertise, we can rapidly deliver eCommerce solutions for global customers," said Murthy. Together the companies will help customers address today's changing business and technology cycles as well as assisting them in achieving and sustaining a unique competitive advantage.
