

INFOSYS ASSISTS EVOLVING SYSTEMS IN MEETING NEEDS OF TELECOM COMMUNITY FOR LOCAL NUMBER PORTABILITY

Contract Designed to Leverage Internal, External Talent Pool

Fremont, CA and Englewood, CO – August 3, 2000 – Infosys Technologies Ltd. (Nasdaq:INFY), a leading IT consulting firm and Evolving Systems (Nasdaq:EVOL), a software, consulting and integration company that enables the next generation of telecom and Internet services, today announced a strategic relationship. To assist Evolving Systems in expanding its commanding lead in local number portability (LNP), Infosys has formed a project team within its Offshore Development Center. The company is currently deploying a staff of 35 which is focused on features, enhancements and maintenance of core telecom technologies in close cooperation with Evolving Systems' internal staff.

Evolving Systems' Q2 2000 LNP-related revenue increased 800% over Q2 1999, so the two teams are working around the global clock to respond to continuous customer and marketplace demands for the company's LNP solutions. With its business growing rapidly, Evolving Systems needed to leverage its internal expertise in order to add more features and functionality to its products and meet time-to-market needs.

"To satisfy customer demand faster than we could do alone we needed a company whose own talent pool had the expertise to meet our staffing requirements," stated DJ Molny, Vice President and Chief Technical Officer for Evolving Systems. After an extensive due diligence process, the company selected Infosys as its partner. Evolving Systems' selection criteria included an emphasis on quality, telephony experience, project methodology and ability to meet commitments.

"The number of features, product enhancements and new products that we've been able to develop has enabled us to better satisfy customer demands - and to do so faster," said George Hallenbeck, Chairman and Chief Executive Officer for Evolving Systems. "As Infosys continues to grow in its knowledge of our product line, we expect them to make an even greater contribution."

"We are pleased to assist Evolving Systems in accelerating its time-to-market and in developing quality software that meets the needs of the wireless market," stated Phaneesh Murthy, Board Member and Head of Worldwide Sales and Marketing. "We look forward to working with Evolving Systems on future products and projects," concluded Hari Murthy, Associate VP and Head of Business Development, Communications & Product Services Practice (CAPS) for Infosys.
