

## Infosys Incubates Onscan

*Bangalore, India – March 2, 2000* – Infosys Technologies Limited (NASDAQ: INFY) announced today that it is currently evaluating **Onscan** – a comprehensive notification service for web users, as a product proposal from a group of its employees. "We had earlier announced our intention to incubate some of the business ideas of our employees and mentor them. Onscan is one such proposal," said Mr. N. R. Narayana Murthy, Chairman and Chief Executive Officer. Infosys had earlier announced that it intended to use incubation funding as a strategy to increase Infosys' awareness to a particular technology, as well as to continue having a stake in its high potential talent.

### About the Product Onscan

Onscan is a comprehensive notification service for web users. Onscan notifies a user when anything of his/her interest unfolds on the web. The notification can be received anywhere – on the desktop, pager, mobile phone or email. By providing only the requested information at the requested medium, Onscan wants to ensure that web users will "Never miss out, ever again." Onscan is freely downloadable from [www.onscan.com](http://www.onscan.com).

Typically, users visit sites any number of times looking for specific information. One may hit the site a little too late or not at all. E-mail notifications, where available, are rarely relevant to the user. If the user is not at the PC, an email saying, "Your auction closes in three minutes" is hardly useful. Moreover, revealing one's email id on web sites is an open invitation to being spammed by obscure web sites. Onscan offers users a simple, unobtrusive solution to these problems.

When a surfer wants any component of a site to be monitored by Onscan, he/she can activate the relevant notification from the browser toolbar. The medium best suited for receiving the notification can be chosen. A brief message reaches the user well in time to act on it. All notifications can be set and managed from one convenient point.

### About Infosys Technologies Limited
