

Quintessent Selects Infosys for Enhanced Telecom B2B E-Commerce Technology and Services

Partnership Provides Collaborative Development and Testing with Faster Time-to-Market for Carriers

FREMONT, CA. – May 15, 2000 – Infosys Technologies Ltd. (Nasdaq: INFY), a leading IT consulting firm, today announced an agreement with Quintessent™ Communications, Inc., a leader in the telecommunication industry's integrated services revolution, to provide collaborative development and testing of components within Quintessent's Tele.Commerce™ suite of business-to-business e-commerce software solutions. The products enable Competitive Local Exchange Carriers (CLECs) to conduct electronic service ordering with Incumbent Local Exchange Carriers (ILECs) and other trading partners.

Under the terms of the agreement, Infosys and Quintessent will work together to develop and test selected applications that automate data exchange between telecommunications carriers. Infosys will provide Quintessent with an offshore lab and its Global Delivery Model, creating a virtual 24-hour workday. Infosys will also deploy its time-boxing model, a methodology for delivering rapid functionality in the timeframes Quintessent specifies. This collaborative relationship will help accelerate the addition of new applications and capabilities within the Tele.Commerce carrier interconnection suite.

"Infosys is a global company with high-quality processes and a delivery model that reduces our time-to-market with business applications that carriers need in order to be competitive players," said Gary Scroggs, Senior VP Product Development and Services, Quintessent. "Infosys' intellectual capital and industry knowledge will support our development effort through scalable processes and reusable methodologies."

"We are pleased to be part of the team building ecommerce applications that are critical to being successful within the competitive carrier landscape," stated Hari Murthy, Associate VP and Head of Business Development, Communications & Product Services Practice (CAPS) for Infosys. "By deploying our unique combination of communications expertise and the Global Delivery Model, Infosys can help meet the needs of the communications industry."

"We are excited about an opportunity to work on such leading-edge applications. It really motivates our team," concluded Babuji Srinivasan, Head of Development for Infosys' Communications & Product Services Practice in Pune, India.

About Quintessent

Quintessent Communications, Inc. enables the on-going integrated services revolution in telecommunications through its business-to-business e-commerce solutions. Quintessent's Tele.Commerce suite of OSS interconnection software products and services efficiently and seamlessly connects the OSSs of telecommunications carriers, enabling them to act as trading partners and thereby allow the consumer to reap the benefits of open competition. The privately-held company is backed by leading investment partners, including Battery Ventures, Benefit Capital Management Corporation, Boston Millennia Partners, ITOCHU International Inc., J.P. Morgan Capital, Polaris Venture Partners and Rho Management Company. Headquartered in Redmond, Washington, Quintessent has broad industry experience in building, integrating and supporting network and service management products for the telecommunications industry.
