

Infosys Technologies Cited as a Leader in North American SOA Systems Integration Services Market by Independent Research Firm

“Highest” Satisfaction Scores from its Reference Clients, “Strong SOA Services Practice in North America” and “Toolset for Accelerating SOA-based Engagements” Contribute to Placement

Bangalore, India – May 11, 2009: Infosys Technologies Limited (NASDAQ: INFY) today announced that it was named a leader in the North American Service-oriented Architecture (SOA) integration services market in the May 2009 Forrester Research report, “The Forrester Wave™: North American SOA Systems Integrators, Q2 2009.”

The Forrester report stated that “Infosys had the highest satisfaction scores from its reference clients, and this high level of satisfaction has earned the firm a place as one of the ‘Leaders’ in this Forrester Wave.”

“Forrester’s research indicates that SOA is becoming the standard approach amongst the leading users of IT in North America, yet there still exists a significant gap in knowledge regarding how to successfully deploy SOA-based systems,” said Shreyas Kamat, AVP and Head, SOA Practice, Infosys Technologies. “We believe the ratings in this report reflect that Infosys has a successful track record coupled with a leading strategy and the technical expertise to help companies leverage the flexibility, cost and service benefits of SOA to transform their enterprise.”

According to the report, Infosys has “made significant investments in SOA capabilities, processes, and accelerators, which has shot them to the top of the pack...” Additionally, Forrester highlighted that Infosys, as an integrator, has a “very strong SOA services practice in North America, and its toolset for accelerating SOA-based engagements has helped it to win work over competitors.” The report concluded that “Infosys is becoming a trusted brand in North America for SOA systems integration capabilities.”
