

SimplexGrinnell Selects Infosys' Supply Chain Visibility & Collaboration Product Suite

Leader in life safety and property protection to enhance sourcing and procurement performance

Bangalore, Boca Raton (FL) – May 25, 2010: Infosys Technologies Limited (NASDAQ: INFY) and SimplexGrinnell, a Tyco International company, announced today that SimplexGrinnell has signed a product license and services agreement to implement the Infosys Supply Chain Visibility & Collaboration Suite as part of its enterprise-wide sourcing business intelligence and spend analysis initiative. SimplexGrinnell will deploy the Sourcing & Procurement module from the suite in the first phase of the initiative. Other modules are planned to be deployed in subsequent phases.

With a large strategic sourcing and procurement organization spread over a network of 150 company-owned offices, SimplexGrinnell sought an enterprise level solution to streamline its procurement processes, optimize its supplier base and reduce procurement spend. The Infosys solution is aimed at reducing sourcing cycle time and leakages in procurement spend through enhanced monitoring, compliance and governance mechanisms.

According to Sanjay Lall, CIO and Vice President of SimplexGrinnell, "We chose the Infosys supply chain solution for its functional depth and modular approach that can be extended enterprise-wide to support our goal to reduce procurement spend. The built-in, out-of-the-box content and performance management features allow quicker deployment at lower program costs."

The Supply Chain Visibility & Collaboration Suite from Infosys is built on top of a core platform employing Microsoft technologies, including SharePoint Server and Office Communications Server, and leverages the latest in performance management, analytics, collaboration and event-based management. The suite empowers procurement professionals to manage the organization's direct and indirect spend by providing visibility to performance metrics, enabling superior decision making, and improving associated processes.

Sanjay Jalona, Vice President and Head, Manufacturing North America, Infosys Technologies, said, "As a large organization with distributed sourcing and procurement network, SimplexGrinnell is looking to Infosys for an enterprise-wide solution for greater visibility into spend, improved collaboration and better performance. The Infosys solution empowers SimplexGrinnell's procurement teams with contextual intelligence to make good decisions and collaboration capabilities to act on it."

"In today's global business environment, manufacturers are increasingly challenged with improving the performance of their supply chain and enhancing visibility across their offices, suppliers and trading partners," said Craig Hodges, general manager, U.S. Manufacturing and Resources Sector, Microsoft. "Infosys's solution incorporates both critical business intelligence and collaboration capabilities from Microsoft that enable customers to obtain real insight from information across their businesses and work quickly as a team to make necessary supply chain improvements to reduce overall procurement spend."

More information on Infosys's Supply Chain Visibility & Collaboration Product Suite is available at the Infosys-Microsoft joint Supply Chain Center of Excellence website: <http://www.nextgenerationsupplychains.com/>.
