Infosys Hyderabad Building Awarded Highest LEED Rating

Fourth LEED Platinum rated building at Infosys, taking the total LEED platinum buildings area to 1 million sq. ft.

Hyderabad, India – April 19, 2012: Infosys, a global Consulting and Technology leader, has been awarded the LEED (Leadership in Energy and Environmental Design) India 'Platinum' rating by Indian Green Building Council (IGBC) for its Software Development Block 1 (SDB 1) at its Pocharam campus in Hyderabad, India. LEED Green Building Rating System is a nationally and internationally accepted benchmark for design, construction and operation of high performance green buildings.

The SDB 1 uses the innovative Radiant-cooling technology – the first in a commercial building in India, setting out higher standards for energy efficiency in building systems design. It has been built keeping in mind a holistic approach to sustainability in five key areas, including - sustainable site development, water savings, energy efficiency, materials selection and indoor environmental quality. This is the fourth Infosys building that has won a Platinum rating, taking the total Platinum certified building area at Infosys to over 1 million sq. ft.

Given the high-standards in terms of building design achieved at the SDB1 in Hyderabad, it has now been showcased in the ***'Best Practices Guide for High Performance Indian Office Buildings'*** by Lawrence Berkeley National Lab, a U.S. Department of Energy (DoE) National Laboratory. Researchers from Technical University of Braunschweig, Germany have also acknowledged the high energy efficiency and comfort parameters in this building after detailed monitoring and study.

Key features of this Platinum rated building include:
- **Water Efficiency:** A 48% reduction in overall water consumption has been achieved in the building through the use of efficient plumbing fixtures and by water recycling. 100% of waste water from the campus will be treated on site, helping in the reduction of potable water consumption.
- **Energy Efficiency:** The building is 40% more efficient than the globally accepted ASHRAE standard. This has been achieved through an efficient building envelope including high performance glazing and adequate shading, radiant cooling system, efficient chillers, pumps and fans, efficient lighting system and smart building automation.
- **Day lighting:** Over 90% of the office space has natural light, reducing the need for artificial lighting during daytime. The design includes light shelves along all windows to ensure that the natural light travels as deep into the building as possible.
- **Efficient Material Selection and Management:** Recycled materials account for 18% of the total value of materials in the building; these include aluminum, glass, steel, plywood and tiles among others. 38% of the total project material by cost was manufactured regionally thereby reducing pollution due to transportation.

Commenting on the certification, Mr. Ramadas Kamath, Senior Vice President - Head of Infrastructure, Commercial, Facilities, Administration and Security at Infosys said, "In 2008, we set out on our journey to design and build the best and most efficient infrastructure for Infosys. With this fourth LEED Platinum certified building, we have achieved a key milestone of 1 million sq. ft. of LEED Platinum office space. As we work towards our goal of becoming carbon neutral by 2018, we are investing in disruptive technologies such as radiant cooling which has helped us reduce our energy consumption by over 50% at SDB 1, Hyderabad compared to the Infosys average. With SDB 1 being showcased in the Lawrence Berkeley

National Lab best practices case study, we hope to inspire our peers to invest in innovative technologies and implement green building design at the core of their infrastructure projects."

About Green Initiatives
Over the past four years, Infosys has taken great strides towards becoming a sustainable organization and has committed to being carbon neutral by 2018. From 2007-08 to 2010-11, Infosys has reduced its per capita energy consumption by 23% and its per capita water consumption by 8% across its operations in India. We now have some of the world's most optimized buildings on our campuses, and are purchasing over 30 million units of green power this year. In addition, in the past three years we have planted over 80,000 trees across our campuses. Infosys was rated the eighth greenest company in the world by Newsweek Magazine. We are in the process of applying for more than 5 million sq. ft. of LEED/GRIHA certifications as we continue on our journey to be leaders in sustainability.

Read more on Infosys sustainability initiatives at Sustainability Report 2010-11.

About Infosys
Many of the world's most successful organizations rely on the 150,000 people of Infosys to deliver measurable business value. Infosys provides business consulting, technology, engineering and outsourcing services to help clients in over 30 countries build tomorrow's enterprise. For more information about Infosys (NASDAQ: INFY), visit www.infosys.com.

Safe Harbor
Certain statements in this release concerning our future growth prospects are forward-looking statements, which involve a number of risks and uncertainties that could cause actual results to differ materially from those in such forward-looking statements. The risks and uncertainties relating to these statements include, but are not limited to, risks and uncertainties regarding fluctuations in earnings, fluctuations in foreign exchange rates, our ability to manage growth, intense competition in IT services including those factors which may affect our cost advantage, wage increases in India, our ability to attract and retain highly skilled professionals, time and cost overruns on fixed-price, fixed-time frame contracts, client concentration, restrictions on immigration, industry segment concentration, our ability to manage our international operations, reduced demand for technology in our key focus areas, disruptions in telecommunication networks or system failures, our ability to successfully complete and integrate potential acquisitions, liability for damages on our service contracts, the success of the companies in which Infosys has made strategic investments, withdrawal or expiration of governmental fiscal incentives, political instability and regional conflicts, legal restrictions on raising capital or acquiring companies outside India, and unauthorized use of our intellectual property and general economic conditions affecting our industry. Additional risks that could affect our future operating results are more fully described in our United States Securities and Exchange Commission filings including our Annual Report on Form 20-F for the fiscal year ended March 31, 2011 and on Form 6-K for the quarter ended June 30, 2011, September 30, 2011 and December 31, 2011.These filings are available at www.sec.gov. Infosys may, from time to time, make additional written and oral forward-looking statements, including statements contained in the company's filings with the Securities and Exchange Commission and our reports to shareholders. The company does not undertake to update any forward-looking statements that may be made from time to time by or on behalf of the company.
