

Infosys collaborates with Stanford Graduate School of Business to Develop World-class Education and Training

Bangalore – November 19, 2014: Infosys, a global leader in technology, consulting, outsourcing and next-generation services, today announced that it will collaborate with [Stanford Graduate School of Business](#) (GSB) to create a comprehensive executive education program. As part of this agreement, Stanford GSB will team with senior Infosys executives to design and deliver a customized strategic leadership development program for the company's executives, clients and partners.

The executive education program will include a suite of business management skills, as well as courses in corporate innovation processes to help Infosys balance business discipline and entrepreneurial spirit. The office of [Executive Education](#) at Stanford GSB and Infosys will deliver the leadership program through in-person and online instruction, as well as live sessions enabled by distance-learning technology.

The initiative will include 200 executives who will each participate in a part-time, year-long program in groups of 40 over three years. Executives will be able to test and apply their learning to real business challenges in parallel.

Stanford has leveraged Infosys' facilities in Bangalore to offer its world renowned [Stanford Ignite Program](#) to participants across India. Stanford Ignite is a certificate program that teaches innovators to formulate, develop, and commercialize their ideas. The part-time program is delivered in-person and through live, high-definition video conference technology, which seamlessly connects Stanford GSB with participants in seven global markets. Infosys has twice hosted the program through its high-definition video teleconference facility at Infosys headquarters in Bangalore. Infosys will now host and support [Stanford Ignite](#) at its teleconference facility in London in 2015.

Speaking about the collaboration, Dr. Vishal Sikka, Chief Executive Officer, Infosys said, "We want to empower our people to help our clients lead the way in finding the great opportunities of our times, and to uncover new solutions in exemplary new ways. This mandates a step change in our thinking. We are excited to be working with Stanford to build and nurture a workforce that is fully equipped to deliver the next-generation services that our clients are looking for."

Safe Harbor

Certain statements in this release concerning our future growth prospects are forward-looking statements regarding our future business expectations intended to qualify for the 'safe harbor' under the Private Securities Litigation Reform Act of 1995, which involve a number of risks and uncertainties that could cause actual results to differ materially from those in such forward-looking statements. The risks and uncertainties relating to these statements include, but are not limited to, risks and uncertainties regarding fluctuations in earnings, fluctuations in foreign exchange rates, our ability to manage growth, intense competition in IT services including

those factors which may affect our cost advantage, wage increases in India, our ability to attract and retain highly skilled professionals, time and cost overruns on fixed-price, fixed-time frame contracts, client concentration, restrictions on immigration, industry segment concentration, our ability to manage our international operations, reduced demand for technology in our key focus areas, disruptions in telecommunication networks or system failures, our ability to successfully complete and integrate potential acquisitions, liability for damages on our service contracts, the success of the companies in which Infosys has made strategic investments, withdrawal or expiration of governmental fiscal incentives, political instability and regional conflicts, legal restrictions on raising capital or acquiring companies outside India, and unauthorized use of our intellectual property and general economic conditions affecting our industry. Additional risks that could affect our future operating results are more fully described in our United States Securities and Exchange Commission filings including our Annual Report on Form 20-F for the fiscal year ended March 31, 2014 and on Form 6-K for the quarter ended September 30, 2014. These filings are available at www.sec.gov. Infosys may, from time to time, make additional written and oral forward-looking statements, including statements contained in the company's filings with the Securities and Exchange Commission and our reports to shareholders. In addition, please note that the date of this press release is mentioned at the beginning of the release, and any forward-looking statements contained herein are based on assumptions that we believe to be reasonable as of this date. The company does not undertake to update any forward-looking statements that may be made from time to time by or on behalf of the company unless it is required by law.
