

## Infosys to Hire Over 2,100 in US, Including 600 Graduates

**Bangalore, India & Palo Alto, California - November 5, 2014:** Infosys, a global leader in consulting, technology, outsourcing and next-generation services, today announced a major recruitment drive in the US to support the growth of its business and enhance its capabilities. The company plans to hire 1,500 professionals for consulting, sales and delivery during the current financial year. In addition, it will hire close to 600 Bachelors and Masters graduates from US Universities over the next twelve months.

With this program, Infosys will bolster its expertise in client relationship management, consulting and technical delivery. The addition of these employees will help Infosys provide its clients local market insights, industry-leading technology expertise, and timely responsiveness to critical issues.

Infosys will recruit up to 300 management and technology graduates from leading US universities. They will work across multiple technology domains including digital, big data, analytics and cloud. Up to 180 graduates will be recruited into the Infosys consulting practice in the US. They will join existing teams advising clients on business and technology transformation strategies. Infosys will also continue its global recruitment program of hiring [MBA graduates](#) from leading business schools, and will recruit 100 Masters graduates for its sales teams under this initiative.

Speaking on the recruitment drive, **Peggy Tayloe, Head of Human Resources in Americas, Infosys** said, *"We believe in hiring professionals who will help us build a next-generation services company. Technology is truly reshaping the world around us today. At Infosys, we offer the best opportunities to learn while working on exciting projects, pioneering the latest technologies for some of the world's best corporations."*

**Sandeep Dadlani, Executive Vice President, Head of Infosys Americas, Infosys** added, *"We are particularly looking forward to bringing a large group of graduates into Infosys in the US. This is a terrific time for young, smart and talented leaders to be graduating from the best American schools and choosing a career in the technology industry."*

This recruitment drive will leverage the wide range of relationships between Infosys and academic institutions across the US. These relationships have been cultivated through programs such as the global [InStep](#) Internship Program and the recently announced [collaboration](#) with the Institute for Computational & Mathematical Engineering at Stanford University.

**Safe Harbor**

Certain statements in this release concerning our future growth prospects are forward-looking statements regarding our future business expectations intended to qualify for the 'safe harbor' under the Private Securities Litigation Reform Act of 1995, which involve a number of risks and uncertainties that could cause actual results to differ materially from those in such forward-looking statements. The risks and uncertainties relating to these statements include, but are not limited to, risks and uncertainties regarding fluctuations in earnings, fluctuations in foreign exchange rates, our ability to manage growth, intense competition in IT services including those factors which may affect our cost advantage, wage increases in India, our ability to attract and retain highly skilled professionals, time and cost overruns on fixed-price, fixed-time frame contracts, client concentration, restrictions on immigration, industry segment concentration, our ability to manage our international operations, reduced demand for technology in our key focus areas, disruptions in telecommunication networks or system failures, our ability to successfully complete and integrate potential acquisitions, liability for damages on our service contracts, the success of the companies in which Infosys has made strategic investments, withdrawal or expiration of governmental fiscal incentives, political instability and regional conflicts, legal restrictions on raising capital or acquiring companies outside India, and unauthorized use of our intellectual property and general economic conditions affecting our industry. Additional risks that could affect our future operating results are more fully described in our United States Securities and Exchange Commission filings including our Annual Report on Form 20-F for the fiscal year ended March 31, 2014 and on Form 6-K for the quarter ended September 30, 2014. These filings are available at [www.sec.gov](http://www.sec.gov). Infosys may, from time to time, make additional written and oral forward-looking statements, including statements contained in the company's filings with the Securities and Exchange Commission and our reports to shareholders. In addition, please note that the date of this press release is mentioned at the beginning of the release, and any forward-looking statements contained herein are based on assumptions that we believe to be reasonable as of this date. The company does not undertake to update any forward-looking statements that may be made from time to time by or on behalf of the company unless it is required by law.
