

Infosys unveils enhanced Supply Chain Visibility & Collaboration Product Suite

*Empowers seamless insights through integrated business process view
Fremont, Calif - Feb. 09, 2011*

News Highlights

- New and enhanced product suite enables organizations to leverage closed loop analytics for unlocking efficiencies and strengthening their supply chain for collaborative decision making and actionable insights.
- The product's self-service capabilities and role-based approach delivers superior user experience with intuitive dashboards and personalized content for every role.
- With logistics and finance being the latest additions, the product suite now offers industry-specific key performance indicators and data models across five key functional areas including sourcing & procurement, inventory and service.
- 7 clients, including 3 Fortune 500 and 3 Global 2000 companies, have partnered with Infosys to drive collaborative decision making across their supply chain.
- The product offers a range of new features and enhancements –
 - **Business Process Dashboards** – New visual dashboards for at-a-glance business process view.
 - **In-Memory BI** - Simple, flexible, and faster access to live reports and analysis with an option for offline analysis.
 - **Personalized Alerts and Initiatives** - Proactive monitoring of information by setting contextual and personalized alerts.
 - **Enhanced Self-Service BI** – Create, view and seamlessly share compelling functional content. Personalize static and dynamic reports with version sharing capability
- The product suite's core platform is built upon Microsoft technologies including, SharePoint 2010, Microsoft Office 2010 and SQL Server 2008 R2.

Key Quotes

- According to Subu Goparaju, Senior Vice President and Head-SETLabs and Product Incubation Engineering, Infosys Technologies, "Organisations are striving to create an agile supply chain with the ability to sense and respond to the dynamic demand chain. The new enhanced Supply Chain Visibility and Collaboration Suite provides ecosystem-wide visibility, contextual intelligence and facilitates a collaborative environment."
- "In today's competitive business environment, manufacturers are challenged to find ways to improve and optimize the performance of their supply chains," said Drew Gude, Director, U.S. High Tech and Electronics Industry Solutions, Microsoft. "Building on Microsoft's business intelligence and collaboration tools, Infosys is

enabling customers to increase efficiencies and gain better visibility to their supply chains across their global offices, suppliers and partners.”
