

BRINGING TOMORROW'S SOLUTIONS TO TODAY'S RETAILERS

Infosys and Oracle help retailers prepare for the next wave of disruption

By combining Oracle cloud solutions with retail solutions, industry expertise from Infosys, and [Infosys Cobalt](#), you can accelerate your digital transformation to support next-gen retailing capabilities—and ensure that you're prepared for whatever comes next.

1

Simplify your supply planning.

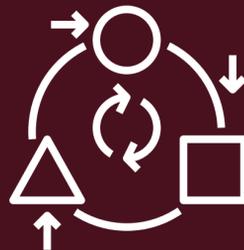

- Align supply with demand, enabling flexibility to help you adapt to last-minute changes.
- Get your products to market faster with prebuilt, easy-to-customize templates.
- Reduce total cost of ownership by up to 20% with SaaS and PaaS options.¹

2

Integrate product design and procurement.

- Use Oracle's template-based item and purchase order induction combined with Infosys' integrated sourcing to reduce time to market for new products.
- Enable offline buying and improve business user productivity with collaborative tools.

3

Modernize the experience.

- Provide a contactless mobile checkout experience using the Oracle POS solution with Infosys Extended Store.
- Enhance the customer experience by enabling self-service and faster checkout.
- Enable product traceability to support inventory management.

Infosys and Oracle helped one Middle Eastern retail pharmacy:

reduce inventory by **10% to 30%**

optimize inventory turns by **2% to 5%**

reduce lost sales by **30% to 40%**²

Are you ready to modernize the retail experience?

Infosys and Oracle can help you modernize, adapt to the changing retail environment, and meet evolving customer expectations.
