Infosys Cobalt is a set of services, solutions, and platforms for enterprises to accelerate their cloud journey. It offers over 14,000 cloud assets, over 200 industry cloud solutions, and makes data-driven decisions for your enterprise. Reducing IT complexity and enabling the flow of real-time information with an ERP system that can help run a live, digital business.

As business process digitization picks up pace and becomes critical to improving competitive advantage, there is a need for today's businesses to have agile systems and solutions capable of realizing fast-changing strategies and processes. However, the enterprise resource planning (ERP) systems in use are expensive and slow in adapting to the rapidly changing business needs. They are unable to deal with the large amounts of data within and outside the enterprise, and are expected to have negligible process disruption and higher security for current investments.

ERP systems also lack the capability to:

- Meet customers' hyper-connectivity & digitalization needs
- Generate real-time insights
- Integrate IoT & cognitive technologies
- Perform on-demand functions
- Customize tailored to my needs

What will the impact be on my organization's performance? How can I reduce infrastructure costs? What will the missed business growth be? What will the value be?

With Infosys' SAP S/4HANA services, businesses can become intelligent and integrated, and can derive real-time insights. Integrated IoT & cognitive technologies and reusability with Infosys can help businesses reduce infrastructure costs. High-performing SAP HANA brings the ability to scale applications to SAP S/4HANA while mitigating conversion risks and reducing costs. With Infosys' SAP S/4HANA Adoption Framework backed up by 40+ tools/accelerators to implement, businesses can have full automation of front- and back-end Fiori. Complete automation of front- and back-end Fiori can decrease the time of the program? How will it impact be on my organization's performance? How can I reduce infrastructure costs? What will the missed business growth be? What will the value be?

Global SAP S/4HANA implementation wins include:

- Up to 20% in AMS for SAP S/4HANA implementation
- Real-time supply chain visibility with SAP S/4HANA which was not possible with earlier legacy application.
- 70% performance optimization in AMS for SAP
- Global consumer goods company achieves end-to-end implementation with SAP S/4HANA versus the 18 hours it took in ECC where MRP was run for individual plants.
- Largest pharmaceutical company in Africa leveraged SAP S/4HANA to automate its custom processes, integration with SAP HANA database with high-level impact assessment, remediation of automation for custom code, and performance optimization.
- US-based confectionary giant closed SAP S/4HANA implementation in 1st month of go live. With SAP S/4HANA, businesses can meet customers' hyper-connectivity & digitalization needs, generate real-time insights, integrate IoT & cognitive technologies, and perform on-demand functions.
